DESIGN - BUILD - INSTALL

BF73 BIFOLDING DOORS

Our aluminium bifolding doors create a visually stunning addition to your home and can add huge value.

Class-leading design features set the BF73 door system aside from the competition.

Thermal performance and slim profile sections to minimise the visible framework and maximise the glass area, is key to their design.

Engineering grade hardware, allows for silky smooth opening and closing operation, without having to pay a premium price. What's more, all our doors come with a 10-year manufacturers' guarantee for your complete peace of mind.

Why choose Aluminium?

Aluminium is extremely durable and more hard-wearing than other materials. You'll be able to enjoy your aluminium doors for not only years but decades to come as they're incredibly resistant to the elements.

It is also an incredibly strong material, therefore providing a high level of security.

Aluminium doors are among the best-insulated on the market, thanks to advanced thermal break technology, which prevents cold transfer.

They require very little maintenance to ensure optimal performance and to keep them looking good as new.

Installed by Rob Cook Carpentry

Installed by Evergreen Garden Rooms

Whether it's a single door, French door, bifolding door or window, they can all be fabricated from the same BF73 system. It's so **versatile** that it can cater for projects that call for shaped frames, fixed frames, sidelights, astragal bars, blinds in glass and can even be used as an entrance door with optional panel inserts.

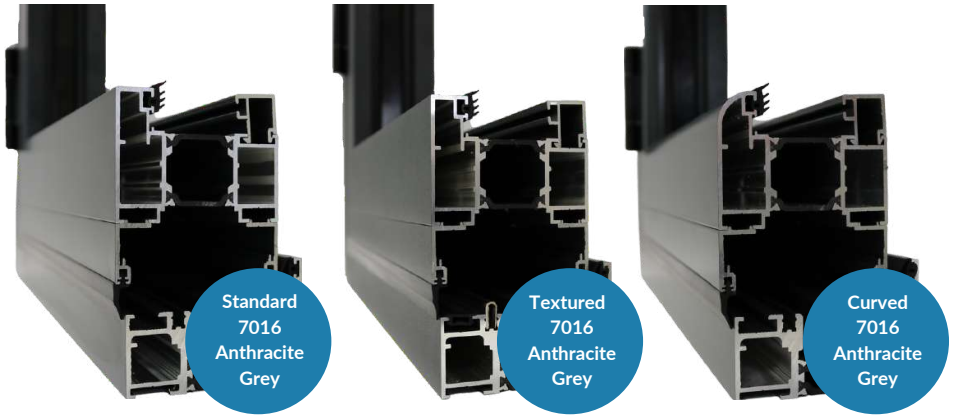

All our BF73 products can be finished in several **glazing options** to create a style to suit any property. **Single doors, French doors, bifolding doors** and **windows**, or **shaped** and **fixed frames** glazing options:

- Double glazed
- Triple glazed
- Integral blinds
- Heritage look astragal bars
- Solid panel inserts

All BF73 sashes are available in 3 profile designs: **square, textured square** (7016 only) and **curved**.

Choose square for a classic look or textured square for a more contemporary alternative. And, if you're looking to complement your property's existing windows, then opt for our newest addition, the curved sash.

LOCK, KEEP AND HANDLE

AluLock is the **ultimate security kit** that combines a euro profile cylinder as standard, with the option to upgrade to the Ultion 3-star barrel, with the Brisant Sweet Handle and an **exclusively** designed Duplex Double Hook Lock.

Ultion Stays Locked

The **Ultion 3-star barrel** provides double the sacrificial protection, made from materials 25% denser than iron and with twice the number of pins than the average lock (including an antipick pin) and 20-point drill protection as standard. If attacked, the barrel enters '**lockdown mode**', meaning the lock is practically impenetrable without heavy and noisy power tools. Brisant are so confident of this that they will pay **£2000** direct to the homeowner should a burglary take place within 10 years from the point of installation and entry was achieved by snapping an Ultion lock.

BRING THE ULTION TECHNOLOGY TO LIFE>

Duplex Double Hook Lock

The **Duplex Double Hook Lock** has been designed by UK-based Ingenious' highly experienced and dynamic design team, providing a 6-point locking system instead of 3-hook, for additional **security**. It comes with a dual follower to allow twin spindle function, which prevents unauthorised entry when the lock is in a latched position.

The Sweet Handle

The safe and stylish **Sweet Handle** is impressively **durable**, carrying multiple coatings of brass and nickel to ensure robust performance against the elements. Brisant also offers a 10-year direct to homeowner **anti-corrosion** guarantee for peace of mind.

The sleek curved design is not only pleasing to the eye but is an impressive **security** feature, stopping gripping tools designed to snap off handles during break ins.
Available in a range of colours including; black, white, grey, chrome and stainless steel. Gold and rose gold also available.

BRISANTSECURE ULTION

Colours

Our doors are available in three standard colours, plus two dual colour options.

For projects requiring bespoke coloured doors, any RAL colour can be available upon request.

Cills and Thresholds

Aluminium cills with pre-drilled screw ports and aluminium **screw-in ends caps** available in our standard stock colours. Cill sizes are **90mm, 150mm, 190mm and 230mm**. Standard 150mm without pre-drilled screw ports in White and Black. uPVC end caps available for standard 150mm cill.

Standard Threshold

Our **Standard Threshold (55mm)** or weathered threshold provides the utmost protection whilst still looking sleek. The standard threshold acts as a full weather break, keeping your home dry and warm regardless of outside elements. Hence, for external bifolding doors, the standard 55mm is recommended.

Low Threshold

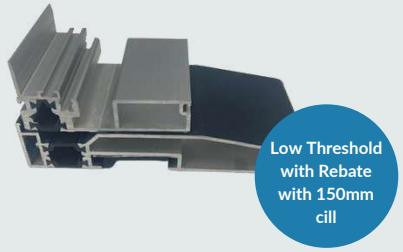

Our Low Threshold (20mm) doesn't offer as much weather protection but creates a seamless look.

Lower thresholds are less of a trip hazard than higher ones so are more suited for those with mobility issues or small children. While the design may be more striking, we don't recommend this for external bifolds unless in sheltered areas.

Low Threshold with Rebate

A 20mm rebate can be attached to our low threshold, making it only slightly higher at 40mm.

The lip of the rebate gives extra weather protection against the elements.

Thermal Efficiency

The BF73 system can achieve a U-value of **1.4 W/m2K** with triple glazed units and **1.6 W/m2K** with 28mm double glazing to meet building regulations.

Weather Resistance

Excellent weather sealing is achieved using specially designed **perimeter seals**, with the option of **weather piles** for lower thresholds. Weather-tightness tested to British standards.

Low Maintenance

Our **low-maintenance** aluminium doors are strong, durable and highly **corrosion-resistant**. Unlike timber, they don't need painting or staining to keep them **weather-proof**, and they won't rust or corrode. They will also never rot, peel or flake.

Maximum Vision

The BF73 Door System gives one of the largest sash sizes available, with up to 1200mm width and 3000mm height per pane.
Paired with super slim sightlines of just 120mm, you'll get the best uninterrupted views.

Floating Corner Post

The **floating corner post** option enables right-angled BF73 bifolding doors, including the return, to open out fully, with the option of a fixed corner, for the ultimate wow factor!
(Structural support needs to be in place.)

Door leaf configuration

BF73 bifolding doors are available in up to 7 leaves each way (14 total). The leaves are able to open either from the left or right of the opening, either opening towards the inside of the property or to the outside – the choice is yours.

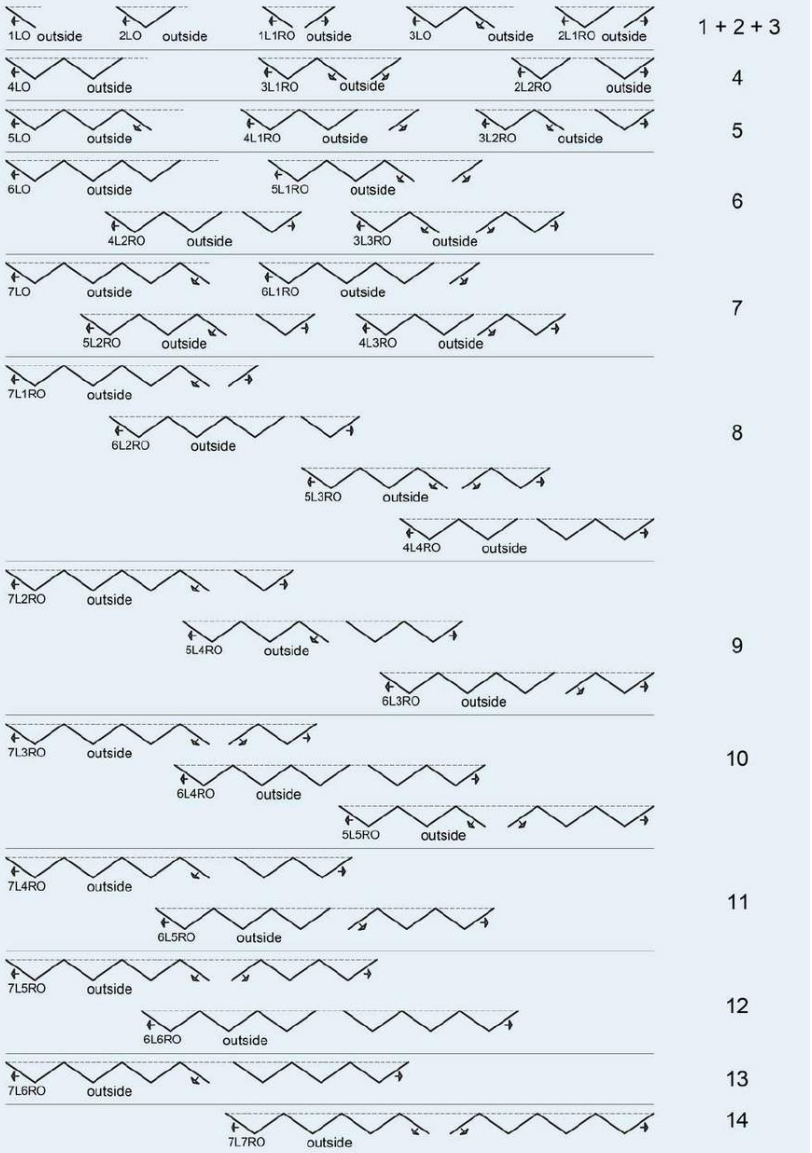

Adjustable Jamb (Optional)

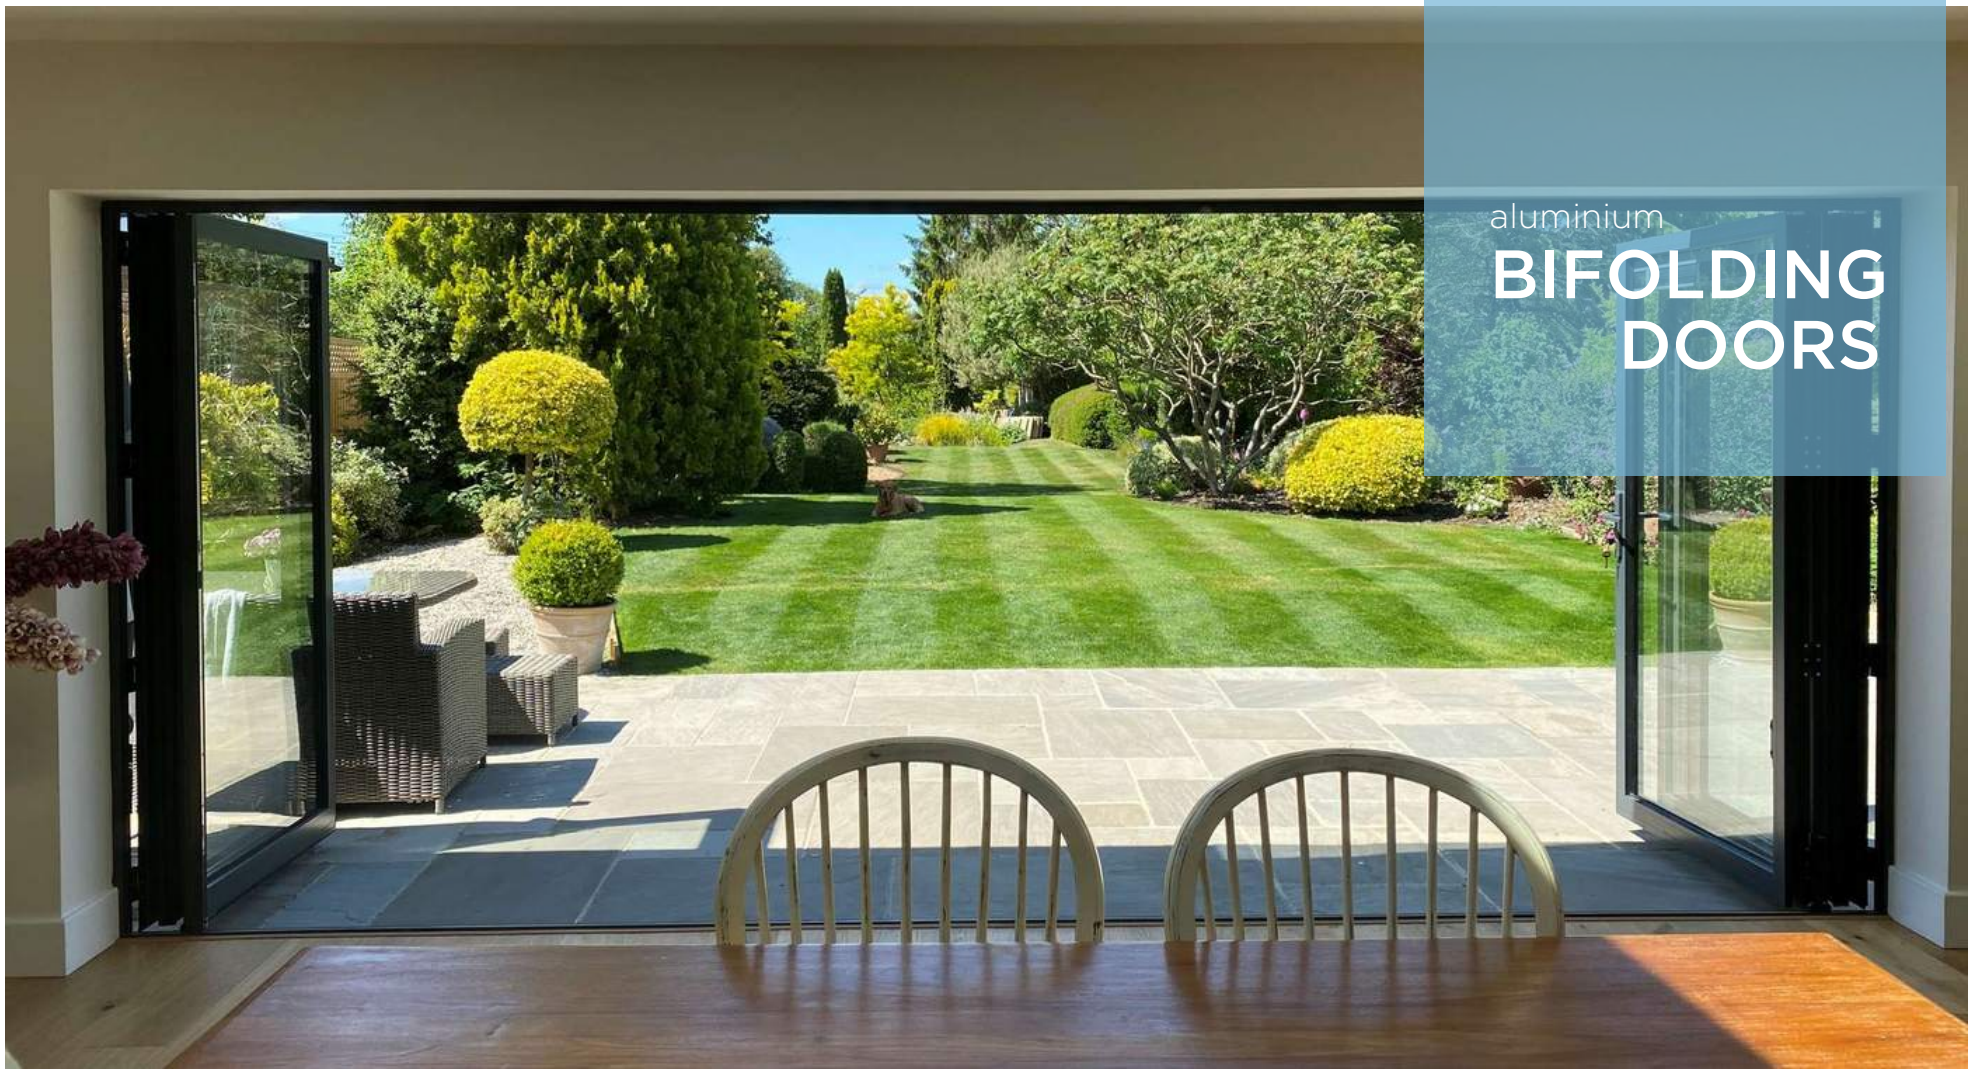

The BF73 system has been designed to be quick and easy to manufacture and install. The system offers an optional adjustable jamb feature for maximum adjustability of +/- 4mm either side during installation and easily adjustable at a later date with an allen key.

Technical details at a glance:

- Market-leading maximum sash size of 1200mm x 3000mm.
- Maximum vision – minimal sight lines of only 120mm or 133mm.
- Maximum security – PAS 24 compliant.
- Maximum insulation value – down to 1.4 U W/m2K.
- Maximum weather proofing – tested to BS6375 Part 1 : 2009.
- Single or dual colour. Factory powder coated to marine quality as per Qualicoat regulations.
- 120kg per door leaf providing for the openings.
- Engineering grade running rollers for a smooth and silky opening and closing operation.
- Trickle vents can be added.

aluminium SLIDING DOORS

PATIO DOORS

Aluminium sliding doors create a visually stunning addition to your home and can add huge value to the property.

Excellent thermal performance and strong, super-slim profile sections to minimise the visible framework and maximise the glass area, is key to the ESS47 Sliding Door's design.

Engineering-grade hardware allows for silky smooth opening and closing operation.

What's more, all our doors are rigorously tested to European safety standards and powder coated to Qualicoat's specifications, for complete peace of mind.

Why choose aluminium?

- Aluminium is extremely durable and hard-wearing. You'll be able to enjoy your aluminium doors for decades to come due to their resistance to the elements.
- It is an incredibly strong material, providing a high level of security.
- Aluminium doors are among the best-insulated on the market thanks to advanced thermal break technology.
- They require very little maintenance to ensure optimal performance and a fresh appearance.

ESS47 Sliding Doors perfectly frame and enhance the outdoor view while creating a light, bright indoor space in your home. They effectively turn an entire wall into glass with the added freedom of accessibility and seamless connection between the indoors and outdoors.

With interlock options of just 25mm or 50mm available, these super slim options allow for maximum vision, excellent thermal performance, noise reduction, high security and weatherproofing.

Designed for large spaces, single, double and triple-track options are available allowing for a variety of opening configurations.

All our products can be finished in several glazing options to create a style to suit any property. Our sliding door range is available with the following glazing options:

- Double glazed
- Triple glazed
- Integral blinds
- Laminated glass

... and many more.

Hardware and Security

The super-slim ESS47 Sliding Door system comes with a range of sleek, complementary hardware available in a variety of colours.

The Sliding Door system can also be combined with a high-security multipoint locking system, keeping your property safe and secure. Check with your manufacturer to see which hardware options they offer.

Configurations

The ESS47 Sliding Door system has a variety of opening configurations, depending on how many panes are chosen and which panes you would like sliding or fixed. There is a perfect solution for every project.

Door Colours

Our doors are available in three standard colours, plus two dual colour options.

For projects requiring bespoke coloured doors, any RAL colour is available upon request.

White RAL9016 | Anthracite Grey RAL7016 | Black RAL9005

Grey Out/ White In | Black Out/ White In | Bespoke RAL colour

Design Features:

- Super-slim 25mm interlock or 50mm non-bonded option available.
- Double and triple track option.
- Inline slider or lift & slide options.
- High-security lock.
- Smooth sliding operation.
- Quick and easy to fabricate and install.

Our aluminium products complement our range of aluminium doors and windows and can be designed to coordinate with each other for a completed look.

They can also be used on their own to make a unique statement.

LOCKING OPTIONS

COMPLETE SECURITY

We've partnered with UK security experts to bring their expertise in product design, manufacturing and testing to produce a composite door with optimal security and performance.

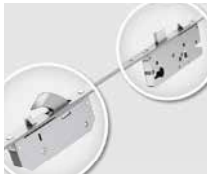

Each CompDoor also comes fitted with the very latest in auto-fire multi point lock engineering. This multi deadbolt auto-fire lock has been rigorously tested to over 50,000 cycles and is fully compliant to PAS-24 security standards. The mechanism automatically engages when the door is closed, with no need to lift the handle, for optimal security and to minimise movement.

TRIED & TESTED

ABS 3 star rated cylinders are approved by the Police Security Association, passing with the Sold Secure Diamond grade-recognised as the highest security standard UK locks can conform to.

MULTI-LAYERED PROTECTION

ABS cylinder feature advanced technology to combat against snapping, picking, drilling and bumping.

ACTIVE SNAP PROTECTION

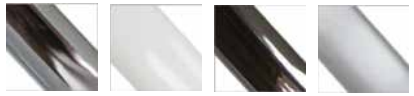

When attacked, a hidden pin within the hardened Molybdenum cam fires into action to create a barrier that would-be intruders can't get past.

COASTAL BLU

Our Coastal range of handle, knocker and letterplate upgrades have been designed for enhanced performance and durability and are arguably the best quality on the market.

The BLU range of suited hardware is made from 316 marine grade stainless steel, compared to the industry-standard of 304 giving it the best long-term resistance to corrosion in coastal locations, supported by a 'best in class' lifetime guarantee.

Composite Door Collection

Precision **Manufacturing.**

We pride ourselves on building a composite door that leads the way in both design and performance, creating a lasting impression.

Endless Designs

Our huge range of door designs have been created to suit all tastes, styles and budgets. Find a range of both traditional and contemporary styles to suit your unique home.

Perfect Finish

Our doors come in either a woodgrain or smooth finish. The 2mm thick GRP door skin is extremely hard-wearing and maintenance free. Resistant to wear, the skin also reflects the finish of real wood.

Countless Colours

Available in a wide range of pre-finished colour options including our TrueGrain wood effect, the doors are coated using a hard-wearing Polyurethane paint system. The doors also come with a 10 year warranty against fade, loss of gloss and adhesion.

Glazing Frames

All glazed doors are fitted with market-leading PAS24 compliant glazing casettes. Many also come as standard with the new contemporary, low profile modern or spotlight options. For traditional styles, we use the industry-leading sculptured system.

Wide Range of Decorative Glass

Choose from our versatile variety of unique decorative glass options that have been specifically designed to complement the unique door styles. We have many options to suit all design styles and tastes, whether traditional, contemporary or minimalist.

Custom **Glass Designs**

As part of our endless range of glass designs, we also have a range of custom Etch Letters and Numbers, available in a range of 4 standard styles and 5 typefaces. The glass ranges from traditional to contemporary styles and make a bold statement which can be used in the door glass itself or in sidelights or toplights.

The glass has a range of styles which comprise of clear numbers on a sandblasted background, however negative versions with standblasted numbers or letters on a clear background are also available upon request.

Created using sandblasting techniques and with a computer designed 'resist' cutter, the custom etch designs are able to product perfectly creared numbers and letters for a striking statement.

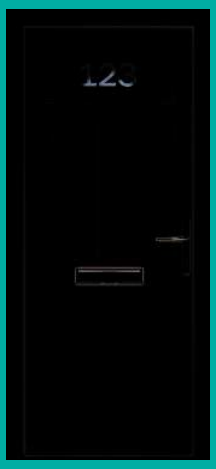

Once a design is produced, it is then incorporated into a high-performing insulated glass unit using warm edge spacers and Low E glass. For extra protection in larger glass options such as sidelights, we also offer the range in our high-security laminated glass units.

Solid | Salisbury 2 | Salisbury 4 | Gladstone | Langton | Wellington | Full Glazed | Mid Glazed

Technical Specification

Our Doors

Our doors are crafted using grained and smooth impact-resistant GRP SMC skins, available in a wide range of styles and colors, including wood stains. The stiles and rails are made from water-resistant pure PVC polymer and reinforced with LVL (laminated veneered lumber) timbers, boasting a minimum density of 570 kg/m^3.

The SMC skins and sub-frame door assembly are fully bonded with Urethane Adhesive Resin. The door is filled with CFC-free polyurethane foam, an excellent insulation material that significantly reduces heat transfer through the door. With a density of 44.5-45.5 kg/m^3, this insulation can help achieve U-values as low as 0.8 W/m^{2}K as part of a doorset assembly.

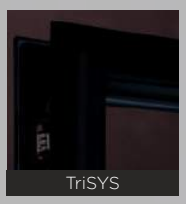

Security

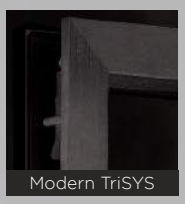

The door slab and glazing system are essential components of any doorset. The capstone slab, reinforced with SecureDesign board and paired with our glazing cassette systems, forms a reliable combination that meets the PAS24:2016 enhanced security standard. This certification is necessary to comply with Secured by Design, a police initiative to prevent unlawful entry, and Document Q of the Building Regulations.

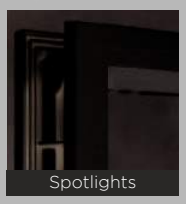

Our door slabs are produced under the BM Trada Q-Mark scheme for quality, ensuring full traceability of all factory processes.

Glazing and Ancillary Options

Glazing cassettes used to frame our glass are available in four options (door design dependent) and are fully de-glazeable should there be need to change the glass.

TriSYS

Modern TriSYS

Spotlights

Craftsman

Glass Units

All double and triple glazed units used in our doors are manufactured to the highest standards and come with recognised accreditations for performance, strength, and thermal efficiency.

Each unit is made with toughened glass, which is up to five times stronger than ordinary annealed glass and complies with EN12150, the international standard for safety glass.

For enhanced security, glazing options can be upgraded by replacing the outer pane of toughened glass with 6.8mm laminated glass. This laminated glass consists of two sheets of annealed glass bonded together with a vinyl plastic interlayer, effectively preventing break-ins.

All sealed units are manufactured to the BS EN1279 standard, ensuring the quality of components and the integrity of the seal, which is backed by a 10-year manufacturer's warranty.

Apeer

70

A++

Enhance your home with the ultimate energy saving door.

Save money on your energy bills

Apeer

Our mission is to help our customers lower their energy bills in style!
We set ourselves a big target: to create an A++ energy efficient door. And we did. There's no other door that comes close.

A++

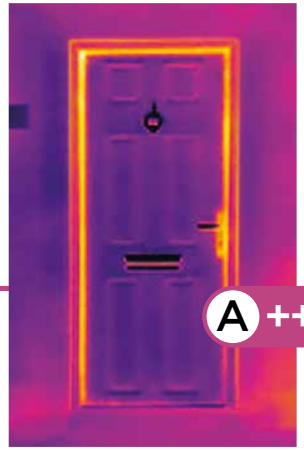

We've put all our energy into saving yours.

With home heating energy prices skyrocketing, Apeer is a door for the times we're living through. No matter how we heat our homes – gas, electricity or oil – it's costing us all a lot more. At Apeer we can't do anything to bring that cost of energy down, but we can stop precious heat escaping through the biggest opening in your home.

Apeer doors are independently tested and proven to be A++ Rated Doors.

An Apeer A++ door is many times more efficient than a timber core door.

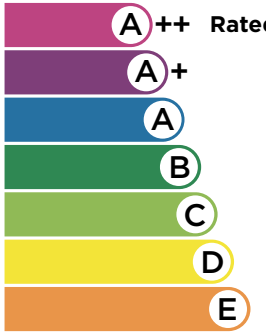

BEFORE
The Timber Core door is showing up in warm colours meaning heat is escaping through the door.

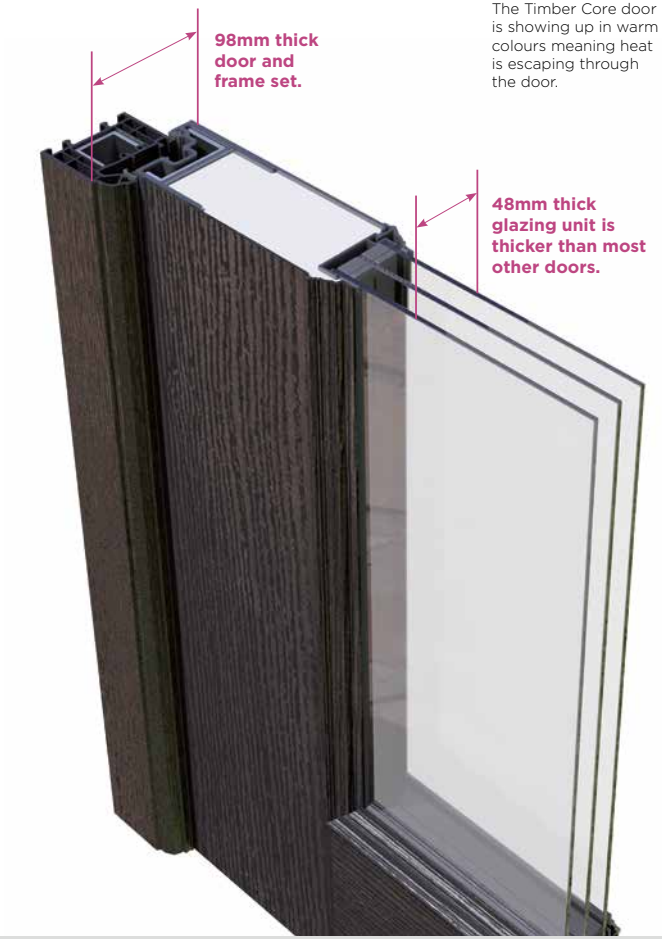

APEER A++ DOOR
The door is showing in cool colours meaning heat is NOT escaping through the door.

An Apeer **A++** energy saving door **saves you money**

When you compare an Apeer door to a PVC Door or Timber Core Door an Apeer **A++** Door is proven to save you money over the life cycle of the door.

HOW HAVE WE MADE AN A++ DOOR?

Our high strength, reinforced polyurethane core provides excellent insulation against the worst of mother nature's chills.

Our double rebated twin-seal construction is virtually airtight by creating an internal secondary seal.

Along with our 70mm super strong core, glass elements are triple glazed for extra insulation. We even gas-fill them for extra performance.

The unique multi-chamber, steel reinforced construction is an awesome insulator – keeping cold weather outside where it belongs.

A++ doors are an optional upgrade.
To achieve **A++** we place a sheet of low emissivity, energy saving Low E Glass either side of our triple glazing unit, with our decorative glass in the middle. Note obscure glass is not available in A++ doors

Our doors are at their best when the weather is at its worst.

For all you know, it could be blowing a gale outside, lashing rain or hailstones. Maybe all three at once. But you can't hear the wind's howl or feel the temperature drop. That's because you have an Apeer front door. Triple glazed, double rebated and twice the thickness of most others, it effortlessly keeps mother nature's wildest tantrums at bay.

Door Corellia APW2 with RG160 glass

GOOD FOR THE PLANET. EVEN BETTER FOR YOUR WALLET.

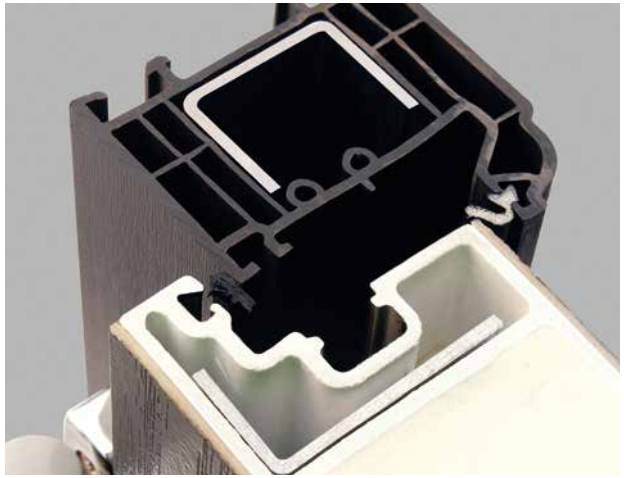

Having one of the world's most energy efficient doors is a smart decision for wise heads. Sealing heat in while keeping cold out, they are A++ Rated by independent testers and far exceed the industry benchmark. By keeping more heat in your home, you'll keep more cash in your wallet.

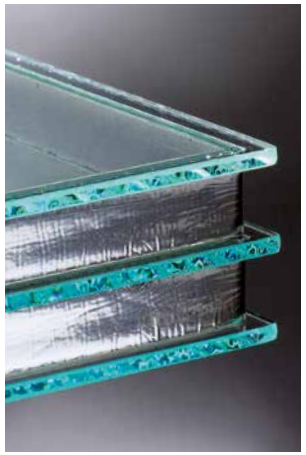

VIRTUALLY AIRTIGHT

Our double sealed rebate is virtually airtight by creating an internal secondary seal.

EXTRA INSULATION

Along with our 70mm super-strong, highly insulating polyurethane core, glass elements are triple glazed for extra insulation. We can even gas-fill them for improved thermal performance.

Glazed units are also available with Low E glass and can be gas filled to offer improved thermal performance.
*Low E glass is only available in clear.

Yale ULTION

You're in safe hands.

We've thought of everything that can go wrong with your door. Then made sure it won't. From police-approved locks to high-resistant frames, you're in safe hands.

Apeer anti-burglary cylinder snap guarantee

£2000

Anti-burglary cylinder snap guarantee in conjunction with Yale and Ultion, if registered within 28 days of purchase with Yale or Ultion, and inline with the T&Cs.

A great night's sleep.

Rest easy - our doors are as secure as they come. Good to know, whether you're tucked up at home or away for the night.

Every Apeer door comes with a multi-point locking system as well as a super-strong, highly insulating polyurethane core that far exceeds all Police-approved security standards.

Strength from within

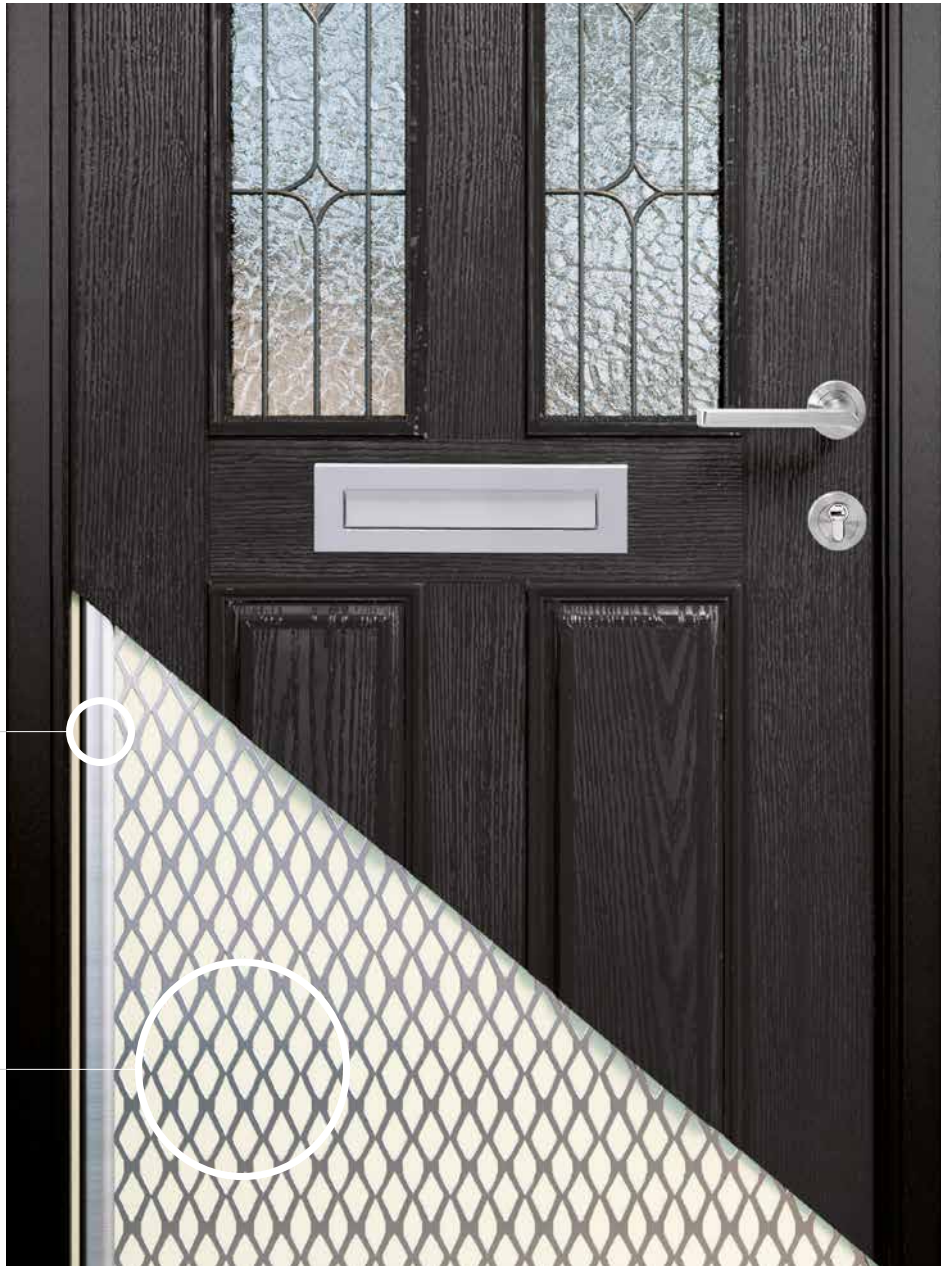

Inside every Apeer 70mm door there's a super-strong steel and metal reinforcing that forms part of the highly insulating polyurethane core. And with a vertical steel bar running top to bottom along the inside edge, our doors far exceed Police-approved security standards.

Extremely strong vertical steel reinforcing bar adds rigidity and security.

Super-strong, metal reinforced, highly insulating polyurethane core.

Yale SensCheck™ Sensors put you in control of your home security.

Using SensCheck™ Sensors, you can check to see the status of your home, from anywhere, anytime.

Yale SensCheck™ Sensors are simple to install in compatible smart doors. Monitor the status of your doors and windows from anywhere at any time via the Yale Smart Living Home App. Receive notifications and tamper alerts straight to your smartphone, or chime notifications when the status of your door or windows change.

Check the status of your doors and windows with your voice.

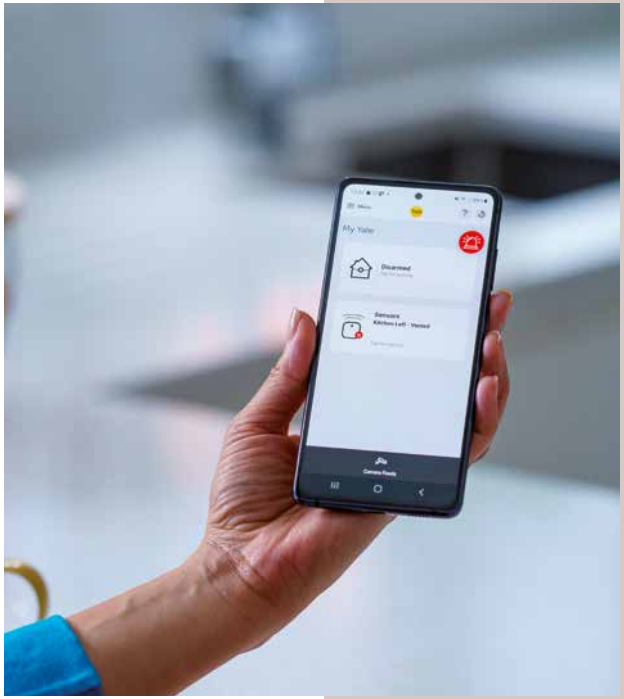

Integration with Amazon Alexa and Google Assistant makes it even easier to check the status of your home.

Simply ask, '...is the back door locked' or '...is the front door closed', and your voice assistant can tell you in real time if you've locked your door or window, giving you total peace of mind.

Integration with Philips Hue means your lights will flash once when alarm is armed, or disarmed. It can also act as a visual deterrent alongside notifications and audible alarm from the Sync Hub.

Senscheck must be specified at the time of order and it cannot be fitted once the door is installed

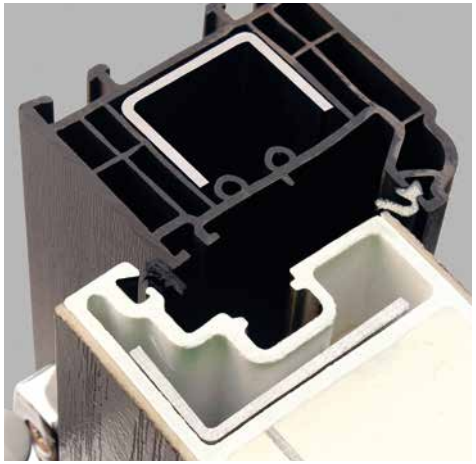

Benefits of SensCheck™ include:

- Sensor status notifications and tamper alerts
- Geo-fencing notifications
- Part Arm functionality
- Chime notifications
- Integration with Amazon Alexa, Google Assistant and Philips Hue
- BSI IoT accredited
- Ability to upgrade to full Yale Smart Security System

Please note Apeer only supplies the lock as Senscheck ready and all additional equipment and fittings must be purchased separately from Yale.

We've got your back. And your front.

Install an Apeer door and you'll have the weight of our entire design team and security specialists protecting you and your home from intruders. Our doors comfortably exceed all industry standard impact and cut-through tests.

Secured by Design doors must be ordered with laminated glass.

Toughened, triple glazing housed in reinforced mouldings with the optional extra of laminate glass for optimum security.

Extremely strong vertical steel reinforcing bar in our doors adds rigidity and security.

A strong coupling bar adds strength and stability.

In order to ensure the best quality accessories are used on Apeer doors, New World reserves the right to replace any of the above options as required. Hardware comes with manufacturer's warranty. Please note the high level automatic lock is not suitable for all users and we recommend you check with your supplier before final order sign off.

Multi-point Yale locking system features two rollers, three hooks, two deadbolts and a latch. It secures the door from top to bottom.

Hardened steel hinge bolts make it virtually impossible to force open our doors or lift them off their hinges.

You pick the colour, we match it.

If one of our 27 colours isn't exactly what you're looking for, our manufacturing process enables you to match your door to most colours. Simply bring along a RAL or BS colour reference and we'll match it.

Check out our standard and premium colour palettes.

LOW MAINTENANCE

To keep your Apeer door looking great, gently wipe down your door with warm soapy water and a soft cloth.

STANDARD COLOURS

PREMIUM COLOURS

Every effort has been made to reproduce the colour of our Apeer doors and the coloured film in the decorative glass designs. However, printing constraints will give rise to some colour deviation. For exact colour matching please request a colour sample from your approved supplier before purchase. Please note the grain on the GRP Apeer door does not replicate the grain on the frame as it is a PVC foil. The grain and colour on the Oak and Rosewood doors are not an exact match to the Oak and Rosewood PVC frames.

Metallic Colours are not available. There is an extra charge for Premium and RAL/BS colours.
We may not be able to match all RAL/BS colours.
5 year guarantee on Premium Colours

All doors with code ACD are extra wide.

Extra wide doors, perfect for accessibility

Wider than our standard doors, our accessible doors are available up to 1087mm wide, allowing ample room for wheelchairs, walking aids and many battery-powered mobility scooters.

Door Hoth ACDG3 with RG154 in door, RG150SL in Sidepanels in White

Door Hoth ACDG3 with RG155 in door, RG21SL in sidepanels in Black

Accessible MDS70 threshold including ramp

The glazing trim on the extra wide ACD traditional doors has been designed to protrude out from the door, and is different to the finish on our standard (AP) doors.

TRADITIONAL COLLECTION

Elegantly timeless, the Apeer Traditional Collection is designed to enhance homes with traditional good looks.

Rowton

Door APM2, Glass BO508*
Shown in Black

A++ *Our exclusive, energy efficient A++ rating is an optional upgrade on the door only and is not available with obscure backing glass.

Furniture Shown: Karcher Handle, Doctors Knocker and Architectural Push-in Letterplate all shown in Chrome. *Glass design shown with Minster backing glass.

Every effort has been made to reproduce the colour of our Apeer doors and the coloured film in the decorative glass designs. However, printing constraints will give rise to some colour deviation. All Apeer 70mm doors are triple glazed as standard. Please note the grain on the GRP Apeer door does not replicate the grain on the frames as it is a PVC foil. Sidelight and toplight designs will depend on sidelight and toplight final sizes and may vary from design shown. Coloured film in glass designs is not an exact match to the door colour.

Amazing Glazing

Add a personal touch with bespoke, handcrafted glass.

You've chosen the door style and picked a colour that perfectly complements your home. Now for the finishing touch: glass designed by you and handcrafted by our in-house artisan glaziers.

Door APM2*, Glass GR1

A++ *Our exclusive, energy efficient A++ rating is an optional upgrade on the door only and is not available with obscure backing glass.

Furniture Shown: Karcher handle in stainless steel. *Glass design shown with Minster backing glass.

Every effort has been made to reproduce the colour of our Apeer doors and the coloured film in the decorative glass designs. However, printing constraints will give rise to some colour deviation. All Apeer 70mm doors are triple glazed as standard. Please note the grain on the GRP Apeer door does not replicate the grain on the frames as it is a PVC foil. Glass designs shown in sidelights may vary depending on sidelight width. Coloured film in glass designs is not an exact match to the door colour. The glass has been designed by our inhouse glass designers specifically for this collection and any imprints on the film are a natural part of the handcrafted process.

Amazing Glazing

Add a personal touch with bespoke, handcrafted glass.

You've chosen the door style and picked a colour that perfectly complements your home. Now for the finishing touch: glass designed by you and handcrafted by our in-house artisan glaziers.

AMAZING GLAZING

New Orleans Glass

Door Corellia with RG160

GLASS DESIGN
KEY FEATURES

Diamond Glass
Flute Lite Glass
5mm Clear Glass Bevels
Black Cameing

PREMIUM, HANDCRAFTED,
ELEGANT, GLASS DESIGN

The complex bevelled design combined with stunning textured glass creates a design with undoubted kerb appeal and 'Wow Factor'. New Orleans combines the opeulence and architecturally inspired design flair associated with the 'Big Easy' and is undoubtedly set to become one of our most popular designs.

PRIVACY LEVEL 1 2 **3** 4 5

Door Endor ACDQ2 with RG158 in Porcelain Blue

AMAZING GLAZING

Beaumont Glass

Door Hoth ACDG3 with RG154

GLASS DESIGN
KEY FEATURES

Blackened Lead Cames
Spectrum Coloured Glass
Waterglass
Kasumi Textured Glass

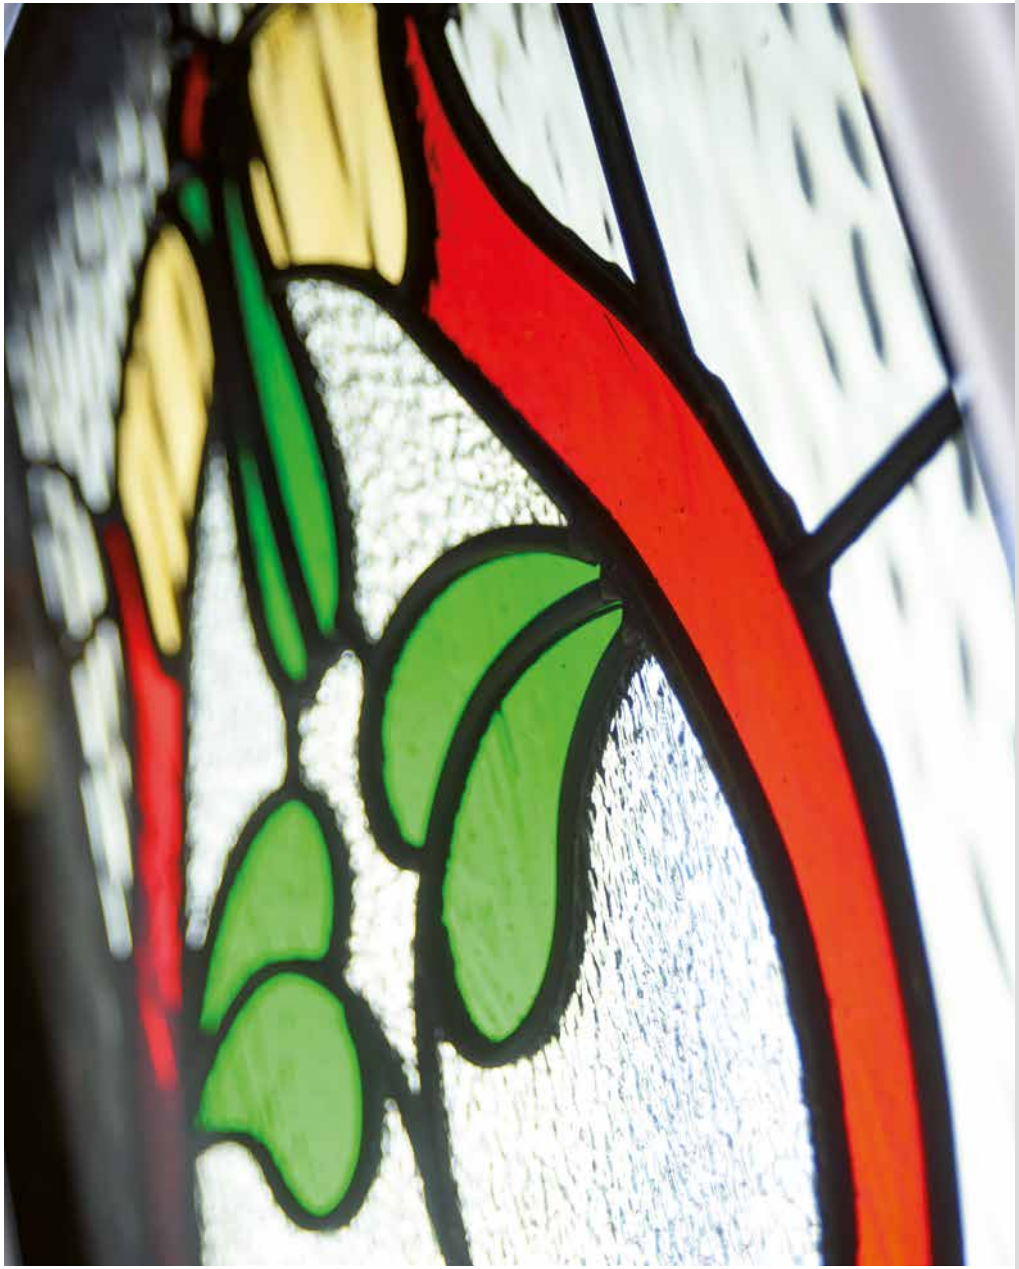

PREMIUM, HANDCRAFTED,
ELEGANT, GLASS DESIGN

The Beaumont is a very traditionally designed glass reminiscent of designs used in the Victorian period. Using a combination of vibrant coloured glasses against a background of softly rippled glass, finished off with blackened cames, this design is ideal for doors in period properties.

PREMIUM, HANDCRAFTED,
ELEGANT, GLASS DESIGN

Simplicity, balance and exceptional quality. The purity of this linear range draws its inspiration from Frank Lloyd Wright, one of America's greatest architects. Hints of cubism come together with leading edge glass technology to create a wonderful multi-textured finish and a surprisingly contemporary design.

PRIVACY LEVEL 1 2 3 **4** 5

Our new glazed GRP side panels add style and sophistication to your home.

The ultimate partner to your door. Perfectly match your door glass design with your sidelight glass using our latest innovation in sidelight design. The moulded glazing trim matches perfectly to the door and we ensure a designer look by lining the top of the door and side panel trims across the full width of your door set.

Apeer side panels are made using high strength glass fibre laminate, utilising a combination of glass fibre weave, reinforced with magnesium silicate board and high density foam to ensure the ultimate in security and energy efficiency.

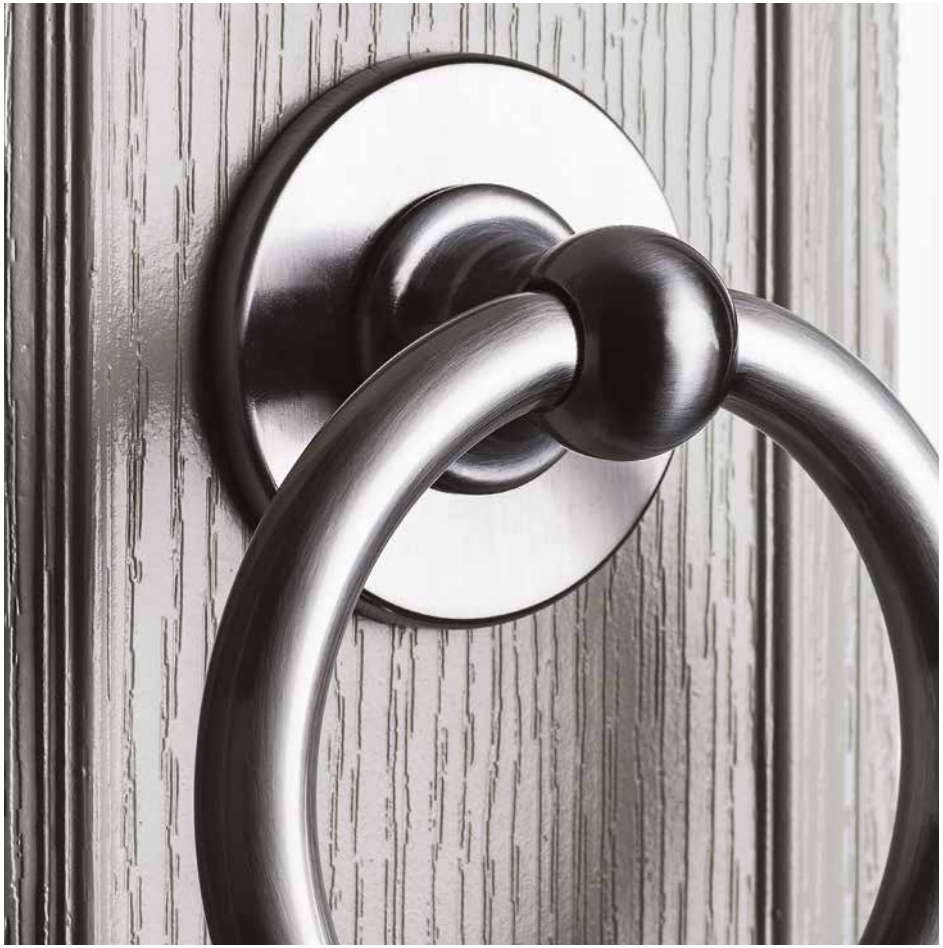

Max width: 550mm inc frame
Max height: same height as door
Min width: TBC
Min height: TBC

Witness lines are visible between the horizontal and vertical panels that make up the doors and side panels. Combined with our realistic grained finish, the witness lines add to the natural look of your door.

Side panels are only available with certain door styles and RG glass designs.

ACCESSORIES

Designed with care and crafted to last, our accessories have been created to complement our door collections. From traditional rustic metalwork to high-end polished chrome, you don't have to look further than the next few pages to complete your Apeer door.

In order to ensure the best quality accessories are used on Apeer doors, New World reserves the right to replace any of the above options as required. Hardware comes with manufacturer's warranty.

PVC-U Panel Door

COLLECTION

Vista 25 YEARS

The Perfect Finish

When you buy a PVCu infill panel for your front door, you can rest assured you are investing in a quality product. PVCu doors are low maintenance and secure.

Every door is available in white or woodgrain effects, Rosewood, Light Oak, Mahogany or Irish Oak. All woodgrain options are finely crafted to look realistic, but unlike wood they are guaranteed not to crack, peel or fade; so you can create the warmth that wood offers, without the hassle. There is also a new range of foiled colours such as the popular Anthracite Grey and Chartwell Green. You can also combine white and woodgrain finishes, so for example, you could have woodgrain on the outside to match the exterior features of your home, and white on the inside providing you with a neutral finish for your interior.

All glass is toughened (kite mark bs6206) and all door panels meet class 1 surface spread of flame classification BS476 part 7. Due to the nature of the product, no liability can be accepted for the accuracy of colours or designs shown which are intended for guidance only. All the door panels in this range comprise of two PVCu skins, pressure bonded to a core material of E.H.D.F.R. A polystyrene (extra high density fire retardant additive) using a specially formulated adhesive that is both heat and moisture resistant. The result is a core free from CFCs and a skin that is approved to BS476:part12 'Method of Test for Ignitability of Products by Direct Flame Impingement'. This offers a high degree of thermal efficiency and, by using our range of reinforcing options, a high degree of security.

2

Foiled Colour Options

* Nearest match. RAL numbers are given in good faith but are for reference only we take no responsibility for other materials not matching our finish.

Glazing Options

Resin Bevel (BP) - No backing glass option available ▲
Using the most advanced technology, this range of resin bevel effect designs has been introduced to complement our existing wide range of glass patterns. Each design is carefully sealed between two panes of glass for ease of cleaning. The glass will not shatter like ordinary door glass but will hold together even if broken. This reduces outside noise pollution. Each resin is obscure and the design will occasionally produce minor imperfections that are generally regarded as acceptable. The resin is glazed on the inside piece of glass facing outwards.

Bevelled Glass (DB)
Traditional handcrafted and bonded to the glass with an optically clear resin then overlaid with lead. These classic and timeless designs will compliment that period home.

Stained Units (CD) (CL)
Combining traditional lead work with coloured film, these designs replicate that stained glass appearance. All stained units are individually hand made and the coloured film may at times, vary slightly from the computer generated brochure.

Sandblasted / Etched Glass (TD) (DB)
This handcrafted glass is now produced using modern technology and is designed to give a traditional appearance. For a more dramatic effect, this is often combined with striking glass bevels. Though generally obscure, it does leave various areas clear.

Silver Grille (DB)
Our Silver Grille options feature attractive traditional motifs that are created using a highly polished chrome framework that is sealed within the double glazed units. Each Silver Grille design is available with a choice of backing glass.

Top Tips

Clean your door about every four months with a non-abrasive cleaner to remove any grime and atmospheric deposits.

To clean your glass, use a soft cloth with soap and water. Avoid excessive pressure when cleaning leaded glass.

Lubricate locks and hardware as required using a light machine oil such as WD40. This will ensure your door continues to function smoothly and quietly.

Amatis Collection

PVC-U Panel Doors

Stylish inverse moulding is the latest feature to be introduced to the PVC-U panel door and has proved to be popular with home owners, which is why we have extended our range to provide you with even more styles to choose from.

On most PVC-U doors, the mouldings are raised from the door. However, with the Amatis inverse collection, the mouldings recess into the door. This creates a more elegant, slimline look that resembles the traditional carved lines of timber, but still has the low maintenance benefits of PVC-U so you get the best of both worlds.

SECTION 07 · WINDOWS

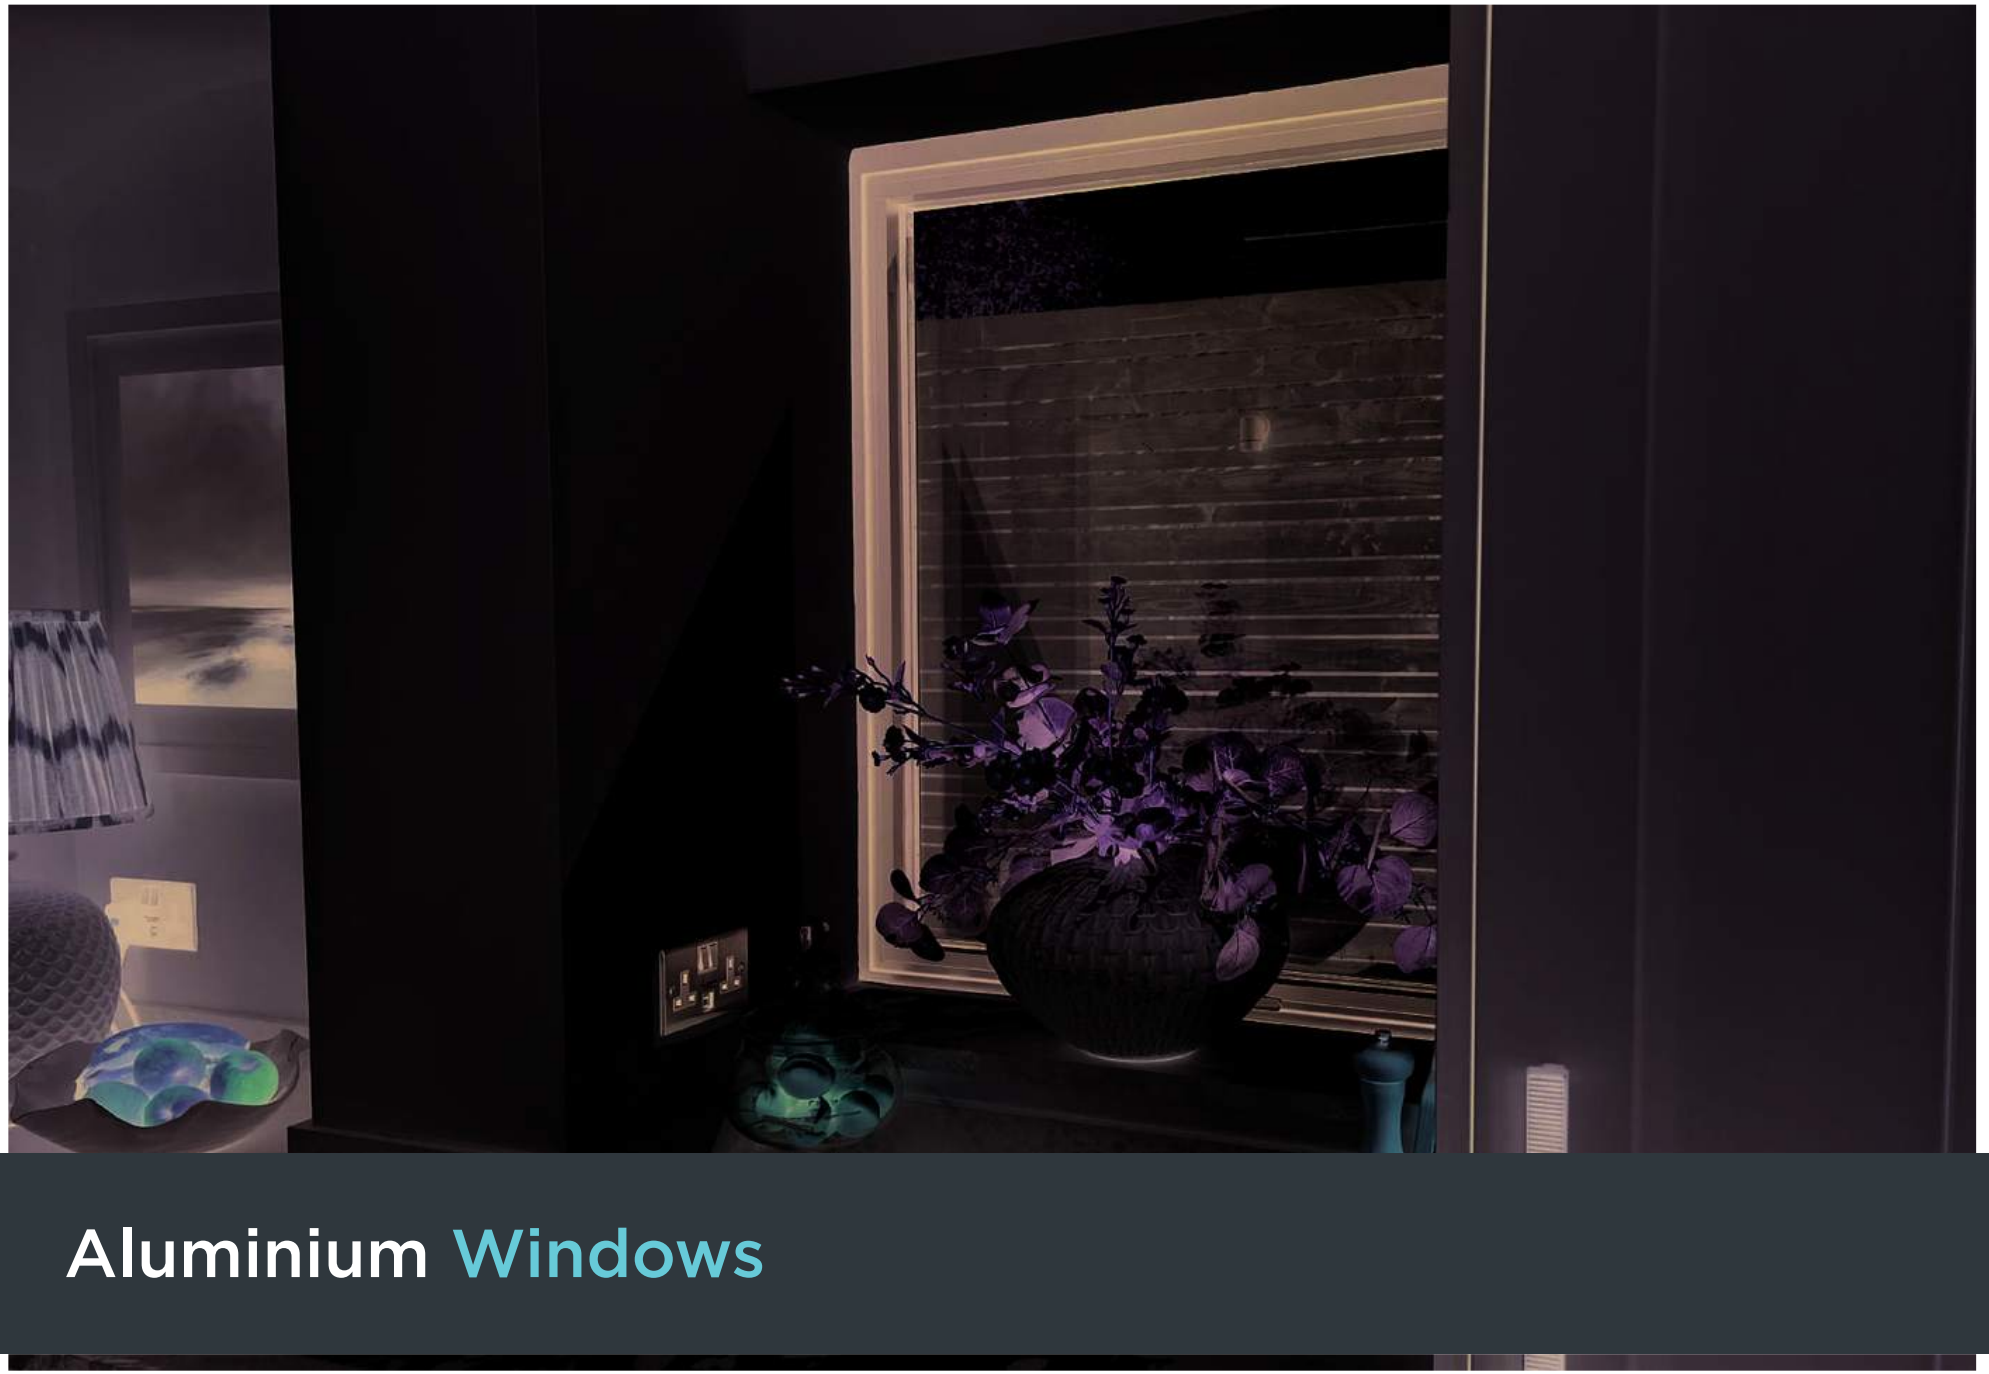

Aluminium Windows

73mm standard or 81mm flush casements, PAS24:2022 certified, in any RAL colour.

ALUMINIUM

11 PAGES · PAGES 193–203

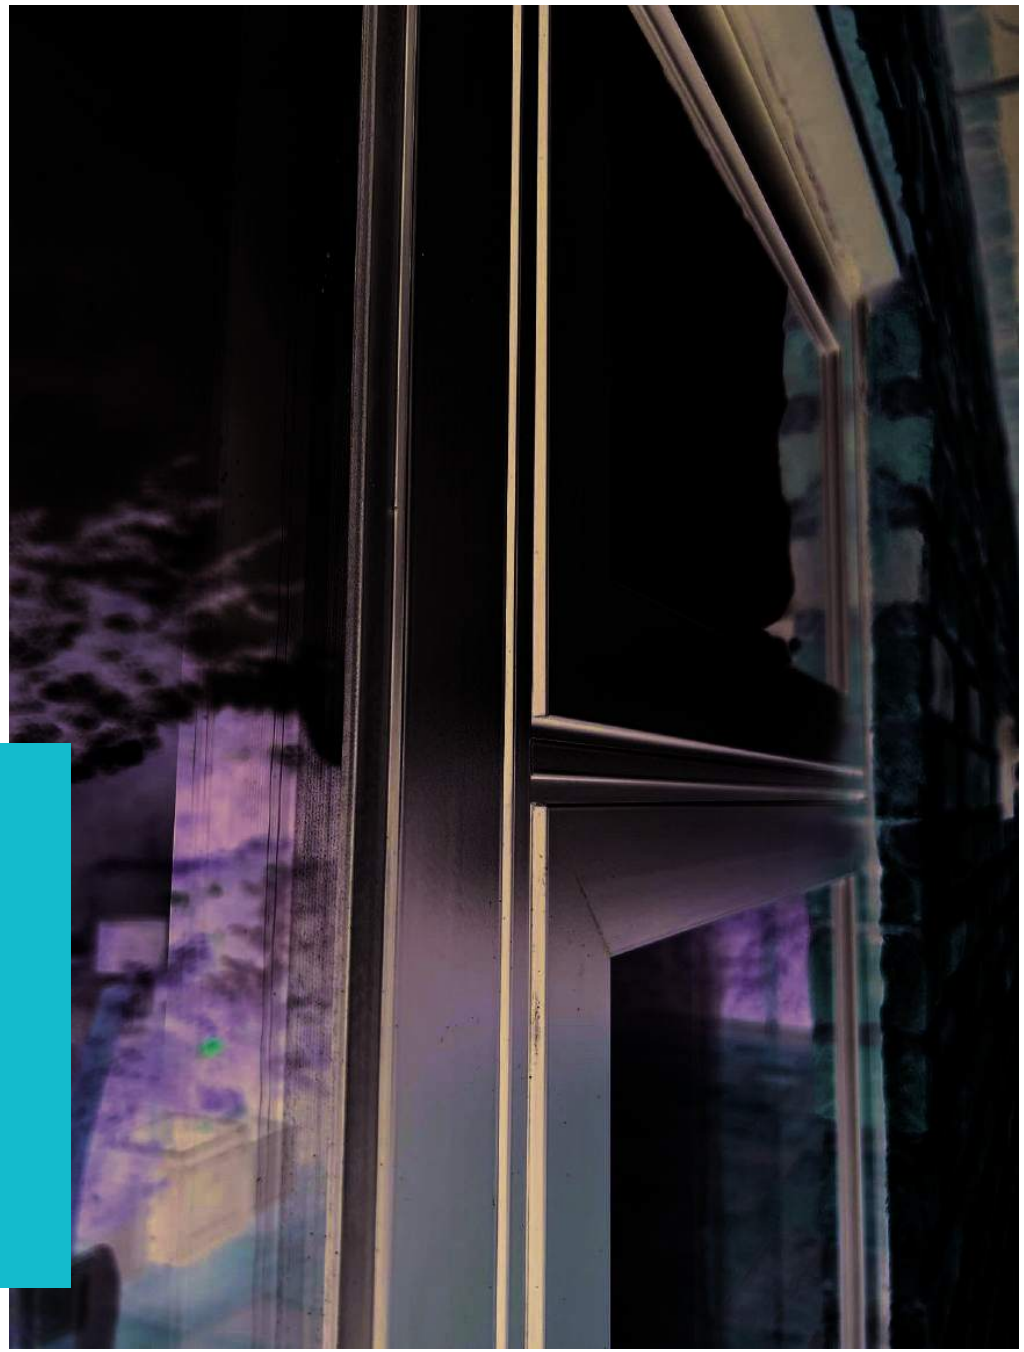

Aluminium Windows

Aluminium Windows

Aluminium windows not only enhance the aesthetic appeal of any property with their sleek design but also optimise performance, ensuring efficiency and durability.

Our window features a super-slim sash that provides minimal sightlines, maximising scenic views while surpassing building standards and securing the new PAS24:2022 certification.

The aluminium window system is designed to seamlessly co-ordinate with our full range of aluminium products, to compliment one another effortlessly.

Why choose aluminium?

- Aluminium is extremely durable and more hard-wearing than other materials on the market. You'll be able to enjoy your aluminium windows for decades to come due to their high resistance to the elements.
- It is also an incredibly strong material, providing a high level of security and impact resistance.
- Aluminium windows are among the best-insulated on the market thanks to advanced thermal break technology, which prevents cold transfer.
- They also require very little maintenance to ensure optimal performance and a fresh appearance.

PICTURE PERFECT WINDOWS FOR EVERY STYLE OF HOME

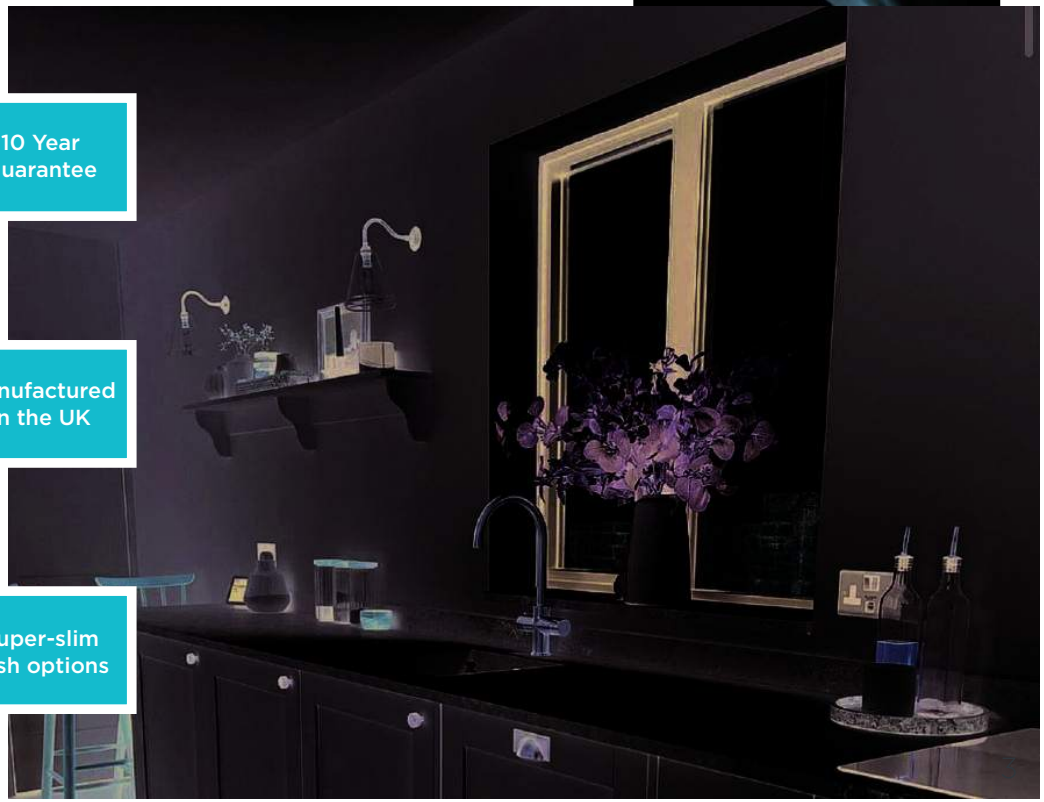

Upgrade your home with versatile aluminium windows that are built to last and designed to perform.

Available in either our standard 73mm profile or our new 81mm flush profile, the windows are custom-made to specific requirements, ensuring the perfect fit so your windows last for many years to come. Acheiving minimal sightlines and a contemporary look, the window elevates aesthetics and enhances kerb appeal.

Whether you're looking to transform a home by replacing existing windows, finding the perfect solution to your new extension, or even completing a full house installation, our made-to-measure aluminium windows can be designed to suit even the most exacting requirements.

The casement windows are ideal for all styles of property, whether modern or traditional, and can be customised with various glazing and colour options to suit the project's unique character and charm.

High Performing Aluminium Windows

- Multiple glazing options*
- Heritage, flush & standard window options
- Excellent thermal performance- U-values as low as 1.4 W/m2K
- Energy rated A (WER) as standard
- Side hung / top hung / fixed light options available
- Perfectly complements our other aluminium solutions

*Please note: All opening windows are internally glazed. All fixed panes are externally glazed, with the option of a dummy sash for internal glazing.

HARDWARE

The Mila handle is available in 6 suited finishes, including Polished Gold, Polished Chrome, Smooth Satin Chrome, White, Black, Anthracite.

Manufactured with ease of operation in mind, the modern design features an ergonomic lever contoured to the shape of your hand, and a tear drop button that offers comfort during use.

Complete with a high-security locking system, the handles are extremely reliable having been tested up to 50,000 cycles. Additionally, the handles come with 10-year guarantee, for extra peace of mind.

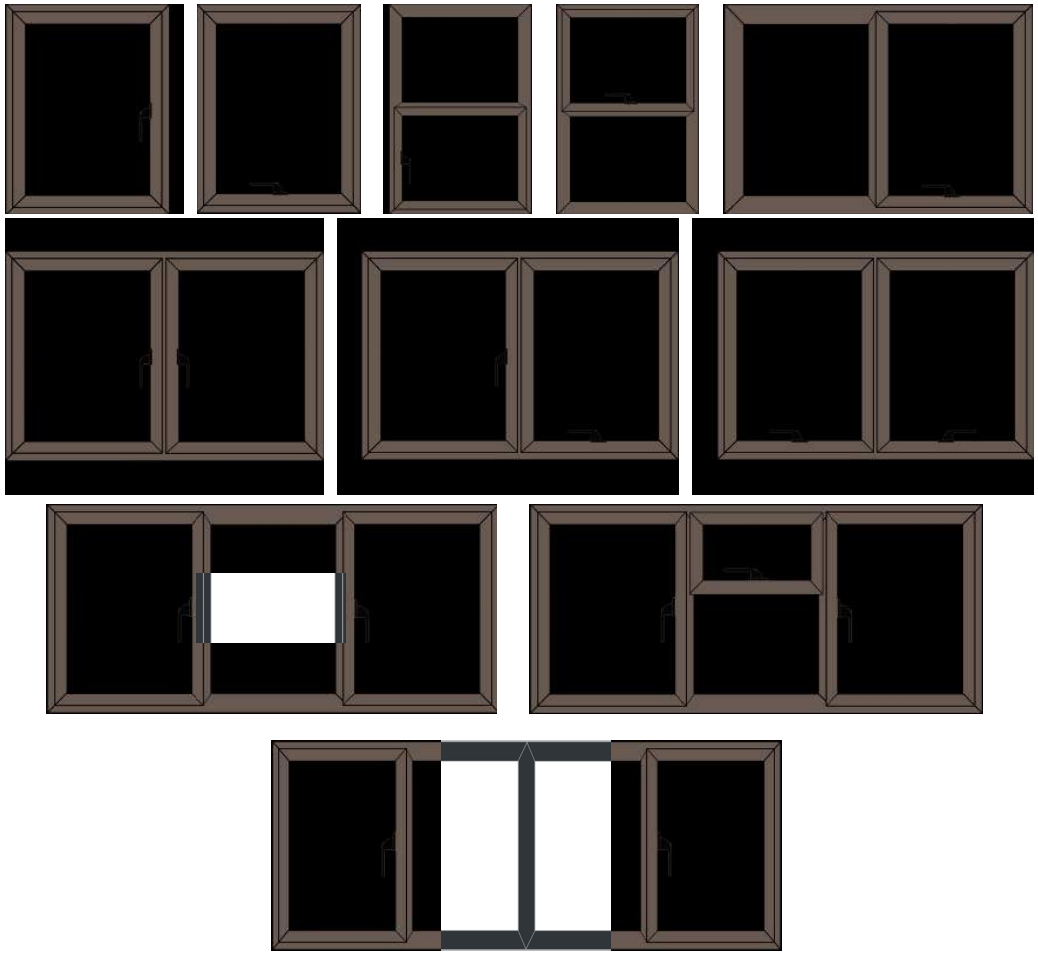

Types of Glazing

Choose from our many glazing options:

- Double Glazing
- Triple Glazing
- Laminated Glass
- Low E & Ultra-Low E Glazing
- Patterned Glass
- Solar Control Glass
- Blinds in Glass

CONFIGURATIONS

Our aluminium windows are so versatile, they can also be used as sidelights to couple to our bifold system, with the standard outer frame. With a huge range of configuration options, there are endless ways to design your perfect windows.

Create your perfect Window

Super-slim sash

COLOURS

Our windows are available in three standard colours, plus two dual colour options.

For projects requiring bespoke coloured windows, any RAL colour can be also be available upon request.

White RAL 9016 | Grey RAL 7016 | Black RAL 9005

Grey Out/ White In | Black Out/ White In | Bespoke RAL colour

Maximum Vision

Minimise visible framework with our super-slim sash option, available for both standard and flush sash.

Enjoy large expanses of glass with large sash sizes and multiple configurations, making the most of natural light in your property.

Eco-friendly Solutions

Aluminium windows offer an eco-friendly advantage because of their recyclability. By installing aluminium products in your home, you're supporting a sustainable cycle where the materials can be repurposed at the end of their lifespan.

Low Maintenance

Our aluminium windows are known for their low maintenance upkeep and high durability.

Unlike timber, they don't need painting or staining to keep them weather-proof, and they won't rust or corrode. They will also never rot, peel or flake.

Weather Resistance

Excellent weather sealing is achieved using specially designed perimeter seals, with the option of weather piles for lower thresholds. Weather-tightness is tested to British standards.

5

Technical Information

At UK Doors Online, our windows are made to your bespoke requirements. From choosing the sash style and profile options, to frame colour and configuration option, you'll be sure to find a perfect style for you.

Frequently asked *questions...*

Q: What's the difference between aluminium & uPVC windows?

Each type of window comes with their own set of advantages. Aluminium windows are known for their durability and longevity, whereas uPVC windows are known for their affordability. Both are energy efficient, whereas aluminium is often a premium choice for both modern and traditional properties.

Q: What design options can I choose from?

Our aluminium windows are fully customisable, with colour and style of frame the main design choice. With flush sash options and additional design features like astragal bars, the windows are extremely versatile in design.

Q: Are aluminium windows energy efficient?

Yes, our aluminium windows are extremely energy efficient, achieving energy rating A as standard. The windows have a thermally-broken design, ensuring the comfort of your home is priority, keeping the property warm in winter and cool in summer.

Q: Do aluminium windows require lots of upkeep?

No, aluminium windows are actually known for their incredible durability and low-maintenance. Just simple cleaning with warm water and a damp cloth as often as regular household cleaning, is all you need to keep your windows looking as good as new for years to come.

Q: Are aluminium windows durable?

Yes, aluminium windows are one of the most durable types of window on the market. Unlike timber, they don't need painting or staining to keep them weather-proof, and they won't rust or corrode. They will also never rot, peel or flake.

Want to find out more?

The opportunities are endless with our aluminium casement windows. If you'd like to find out more or have any questions of your own, our friendly team of experts are always on hand to help.

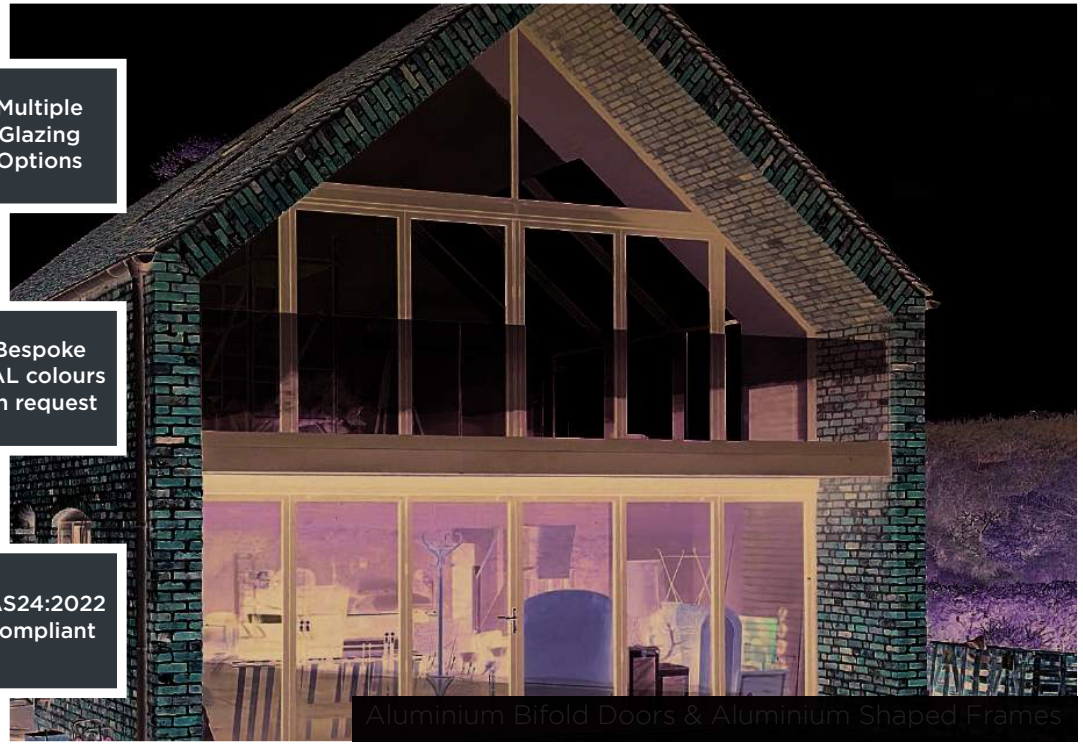

Aluminium 3 pane window

we manufacture industry-leading aluminium and uPVC products specifi cally for the UK market.

Hear it from our customers!

J Cornish- ★★★★★

Fabulous products and customer service. Delivery was quicker than other companies and delivered on the promised day. I would recommend this company to anyone. Six stars.

M Booth- ★★★★★

Great value products & service that exceeds the price! From the first interactions through to the last, they were without a doubt one of the most professional, dedicated and helpful companies I have ever dealt with!

Zed- ★★★★★

Excellent Service!
Brilliant service, great price and stress-free service from quotation to delivery. Staff have great communication, all round great company to do business with!

9

Our aluminium bifold doors pair perfectly with our aluminium windows. The slim profile section of the window is made of the same components, making the perfect pair when using as sidelights, shaped and fixed frames.

To enhance the space further, adding a roof lantern is a brilliant way to flood a room with more natural light, and make the space feel larger due to the heightened roof.

Bifold Doors & Roof Lantern

Other Products

Our product offering doesn't end with aluminium windows. We have a full range of other aluminium & uPVC home improvement products that cater for any project, any style, and any aperture.

Other products include:

- Roof lanterns & Flat Roof Lights
- Windows & Fixed Frames
- Patio doors
- Composite Doors

Sliding Patio Doors

As an enhancement to modern homes, our aluminium sliding patio doors boast seamless aesthetics for uninterrupted views. The large expanses of glass helps to open up a space and bring the outdoors in.

Composite Doors

uPVC Products

we also offer a large range of uPVC products including windows, entrance doors, sliding patio doors and french doors. Handcrafted in our South Yorkshire factory, the products boast market-leading features and brilliant energy effi ciency.

DELIVERY

Having an in-house delivery service team allows us to provide some of the fastest lead times in the industry.
Our fleet of vans will travel far and wide to ensure that your products are delivered direct to your door.

TEAM

Our excellent manufacturing process has seen us on the receiving end of multiple industry awards.
We take a great deal of care in our processes in order to deliver the highest quality of bespoke products.

SERVICE

We make it our mission to provide the highest standard of customer service with each and every customer we serve.
From quote to delivery, our expert service team is on hand through every step of the process.

Kubu®
Smart Security

Kubu is the invisible link between your windows and doors and extra protection to keep you and your household safe. It offers peace of mind through intelligent, real-time monitoring of your doors and windows.

Unlike standard sensors, Kubu tells you not just if a door or window is open but whether it's locked or unlocked. With geofence alerts, you'll never leave home unsecured again. Kubu integrates seamlessly with smart home systems, enabling automations like turning off heating when a window opens. Features like SureShield™ and SureSecure™ provide critical alerts, even overriding 'Do Not Disturb' mode when needed.

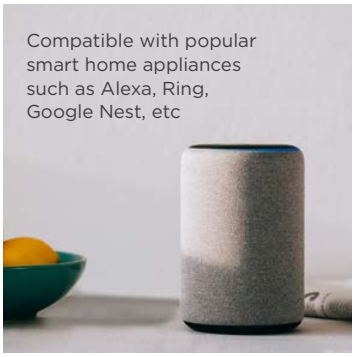

Share access with family, carers, or landlords, and enjoy scheduled or lifestyle notifications tailored to your routine. Kubu's discreet sensors maintain your home's aesthetics while enhancing security. Designed for UK homes, it's a smart, simple and secure solution, backed by a up to 10-year mechanical warranty and a £2,000 Smart Security Guarantee.

Kubu is the only sensor on the market that tells you if your window is open, closed, fully-secured or even if it is under attack.

Smart Alerts

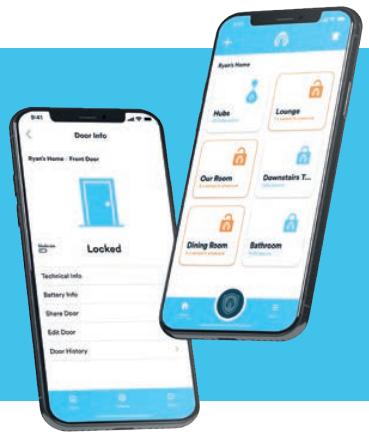

- Family sharing
- SureShield™ attack alerts
- SureSecure™ geofence alerts
- Scheduled notifications
- Insurance backed

Smart as Standard

All products within the Ultima range include Kubu as standard. This means your door or window is already smart, with no extra hidden costs, no complex set up and no need to replace anything. All it requires you to do is download the free Kubu app, pair your sensors then you are ready to go, safe and secure.

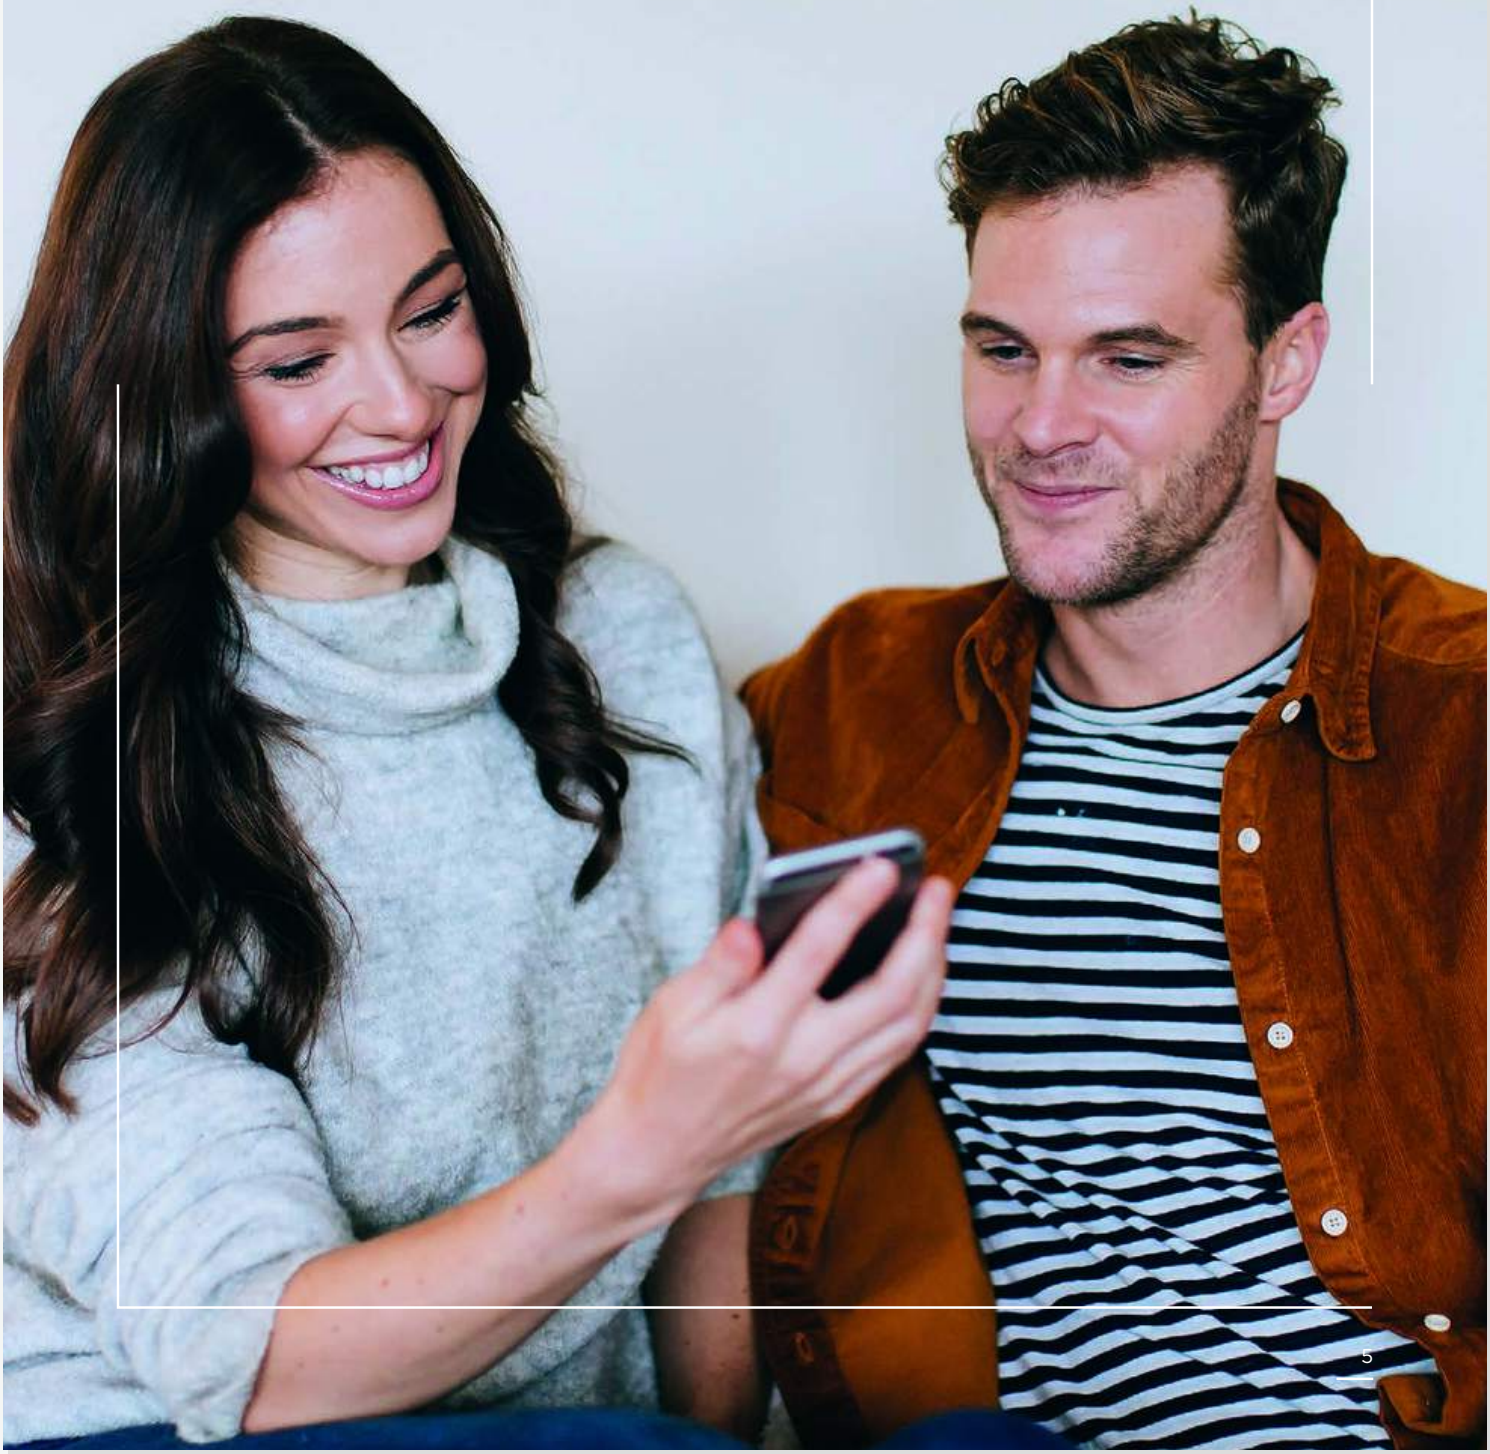

Smart Sensors

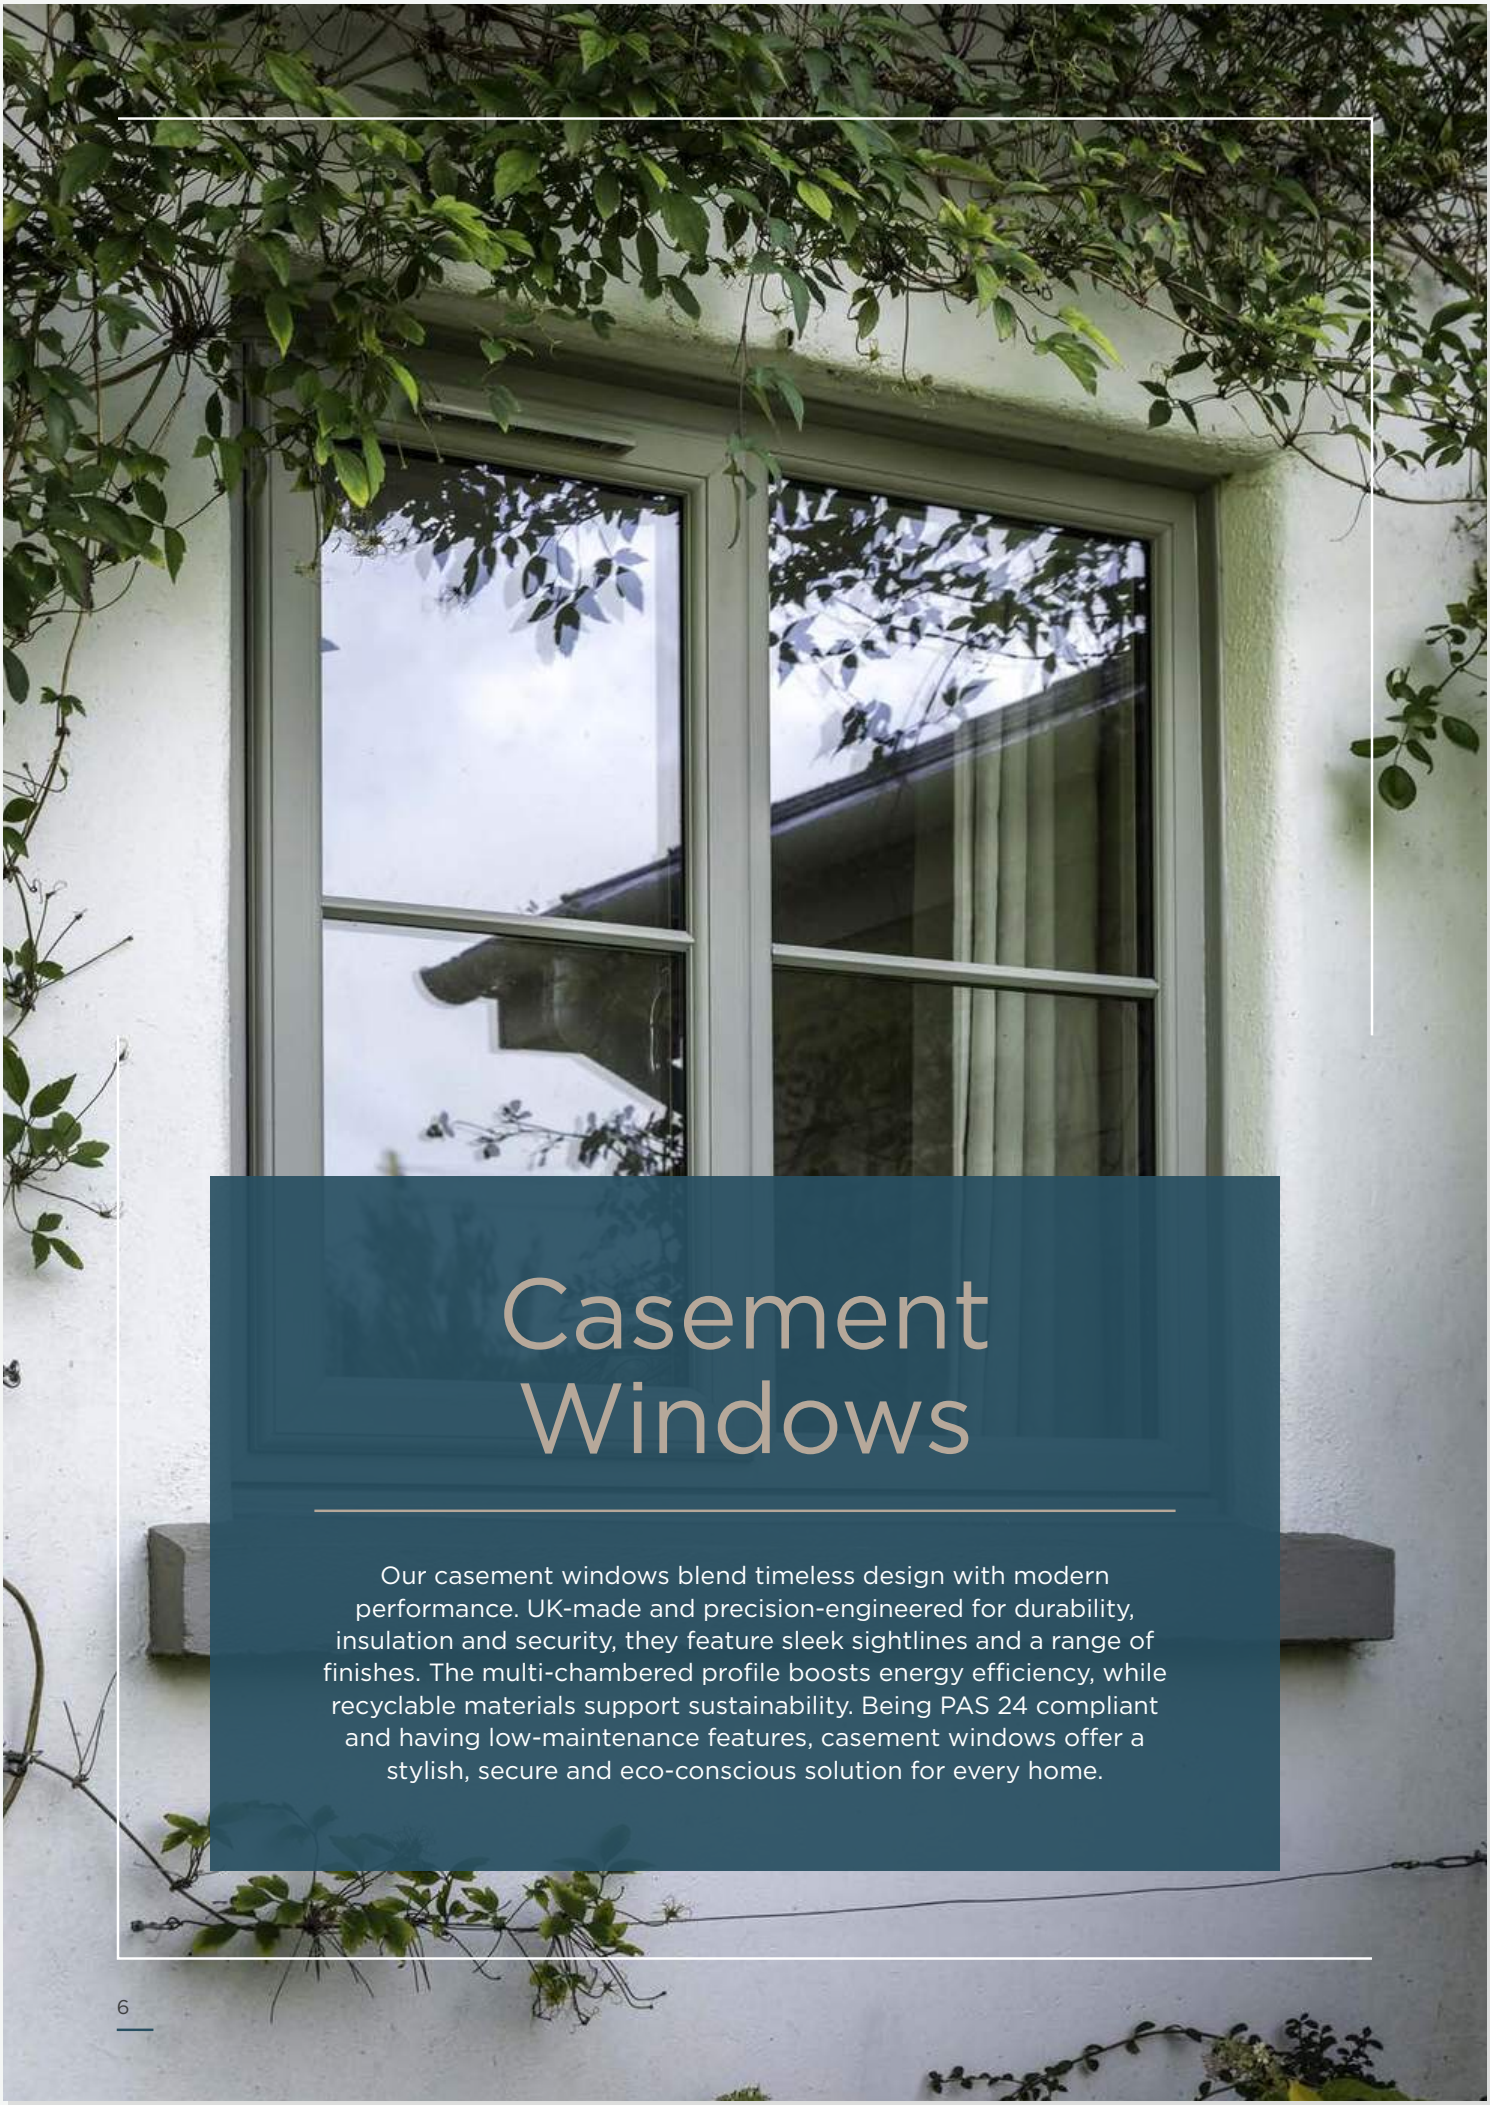

- Tamper protection built in
- Reports open, closed, locked and vent mode
- Detects breaches before they occur
- Physical and technological security combined
- Alerts you when you leave your home if entry points are locked

Kubu Smart Security is fitted as standard on all our windows and doors, ensuring your home is protected against intruders.

Casement Windows

Our casement windows blend timeless design with modern performance. UK-made and precision-engineered for durability, insulation and security, they feature sleek sightlines and a range of finishes. The multi-chambered profile boosts energy efficiency, while recyclable materials support sustainability. Being PAS 24 compliant and having low-maintenance features, casement windows offer a stylish, secure and eco-conscious solution for every home.

Ultima casement windows deliver a perfect blend of classic design and advanced performance. Proudly made in the UK, each window is engineered for strength, energy efficiency, and security. With slim sightlines and a wide range of finishes, they enhance any home's appearance. The multi-chambered profile improves insulation, helping lower energy costs while maintaining year-round comfort and our weather seals offer up to 25% more weather coverage than the industry standard.

High-security locking systems and PAS 24 compliance offer reassurance, while easy-clean hinges and low-maintenance materials simplify everyday use. Whether you're upgrading a period property or fitting a new build, Ultima provides a flexible, future-ready solution. Backed by our award-winning expertise and customer care, Ultima casement windows are a smart choice for those seeking style, substance and long-term value.

Timber Alternative Windows

Ultima timber alternative windows offer the charm of traditional timber with the benefits of modern materials. Designed for durability, security, and low maintenance, they feature authentic woodgrain finishes and advanced locking systems. PAS 24 compliant ensures robust protection making them ideal for heritage homes or classic styling with contemporary performance.

Our timber alternative windows deliver the timeless aesthetics of traditional timber with all the advantages of modern materials. Designed to replicate authentic woodgrain textures and finishes, they offer a classic look and feel without the maintenance demands of real wood.

Built for long-term durability, these windows resist warping, rotting, and fading, making them ideal for heritage properties or those seeking a traditional look. Security is a key feature, with advanced locking systems and PAS 24 compliant providing robust protection against forced entry. Our innovative weather seals offer up to 25% more weather coverage than the industry standard, ensuring long-lasting performance. With Ultima, you get the charm of timber, the strength of modern engineering, and the peace of mind that comes from enhanced security and low-maintenance design.

Security & Child Safety

Our Ultima range of doors and windows are built with advanced security features including PAS 24 compliant locking systems for peace of mind and Kubu Smart Security systems built in as standard. Child safety is prioritised with restrictor options and secure locking mechanisms that prevent accidental openings. Designed for everyday protection, we have combined robust engineering with thoughtful safety features to keep families secure at home.

Safe and secure for your protection and reassurance.

PAS 24 compliant

BS EN 12606 accredited

Security guarantee

Child-safety window hinge with built-in opening restrictor

Manufactured in the UK

Kubu enabled with smart alerts helping you keep track of door activity

Multi-point locking systems ensure robust protection against forced entry

With strengthened areas around locks and handles, our frames offer superior rigidity and hardware retention

Impact resistant materials, with high structural integrity

Tilt & Turn Windows

Our tilt & turn windows offer flexible ventilation and secure access in one sleek design. With dual-opening functionality, they tilt inward for airflow or turn fully for easy cleaning. Built with advanced locking systems and PAS 24 compliant, they deliver high security, energy efficiency, and modern style, ideal for upper floors and contemporary living.

Tilt & turn windows offer versatile functionality with enhanced security built in. Their dual-opening design allows the window to tilt inward for safe, controlled ventilation or fully turn for easy cleaning. This flexibility makes them ideal for upper floors and modern living spaces.

Engineered with advanced multi-point locking systems and PAS 24 compliant, they provide robust protection against forced entry. The inward-opening mechanism also adds an extra layer of security, making it harder to access from the outside. Our weather seals offer up to up to 25% more weather coverage than the industry standard. With sleek aesthetics and high-performance materials, our tilt & turn windows deliver style without compromising safety. Whether for residential or commercial use, they offer a smart, secure solution tailored to today's lifestyle demands.

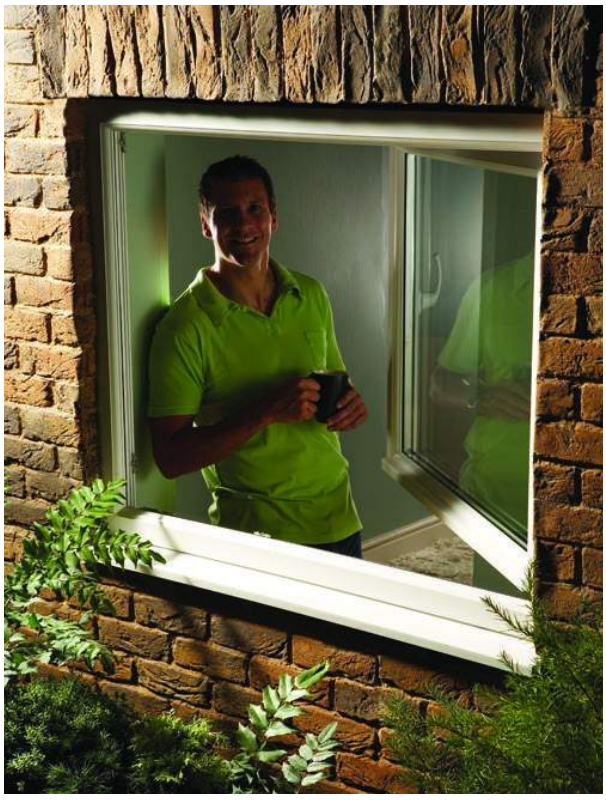

Product Features

- **Double Glazing U-value:** 1.2W/(m²K)
- **Triple Glazing U-value:** 0.8W/(m²K)
- **Acoustic Performance:** 36-44 dB
- 6 chamber system on outer frame
- Kubu enabled via RetroFit Kit
- PAS 24 compliant
- Available in chamfered and sculptured

Flush Tilt & Turn Windows

Ultima flush tilt & turn windows combine sleek aesthetics with versatile functionality and enhanced security. The dual-opening design allows safe ventilation and easy cleaning, while PAS 24 compliant locking systems and inward-opening mechanisms offer robust protection. Ideal for modern living, they deliver style, flexibility, and peace of mind.

Our flush tilt & turn windows offer a sleek, modern appearance with advanced functionality and built-in security. The dual-action design allows the window to tilt inward for safe ventilation or fully open for easy cleaning. The flush finish delivers a streamlined look that suits both contemporary and traditional properties.

Engineered for security, each window features PAS 24 compliant locking systems and inward-opening mechanisms that enhance protection against forced entry. Ideal for upper floors, these windows combine style, practicality, and peace of mind. With durable materials and precision engineering, they ensure long-lasting performance and safety. Our innovative weather seals offer up to 25% more weather coverage than the industry standard. Whether for residential or commercial use, flush tilt & turn windows provide a secure, elegant solution tailored to modern living.

Product Features

- **Double Glazing U-value:** 1.2W/(m²K)
- **Triple Glazing U-value:** 0.8W/(m²K)

ENERGY RATING A+

Energy Efficiency

All our products are engineered with energy efficiency at their core, helping homeowners reduce heat loss and lower energy bills. Featuring advanced glazing technology, multi-chambered profiles, and high-performance seals, all our doors and windows provide excellent thermal insulation. This ensures a comfortable indoor environment year-round while minimising environmental impact.

Whether upgrading a home or building new, Ultima offers stylish solutions that meet modern energy standards without compromising on design or durability.

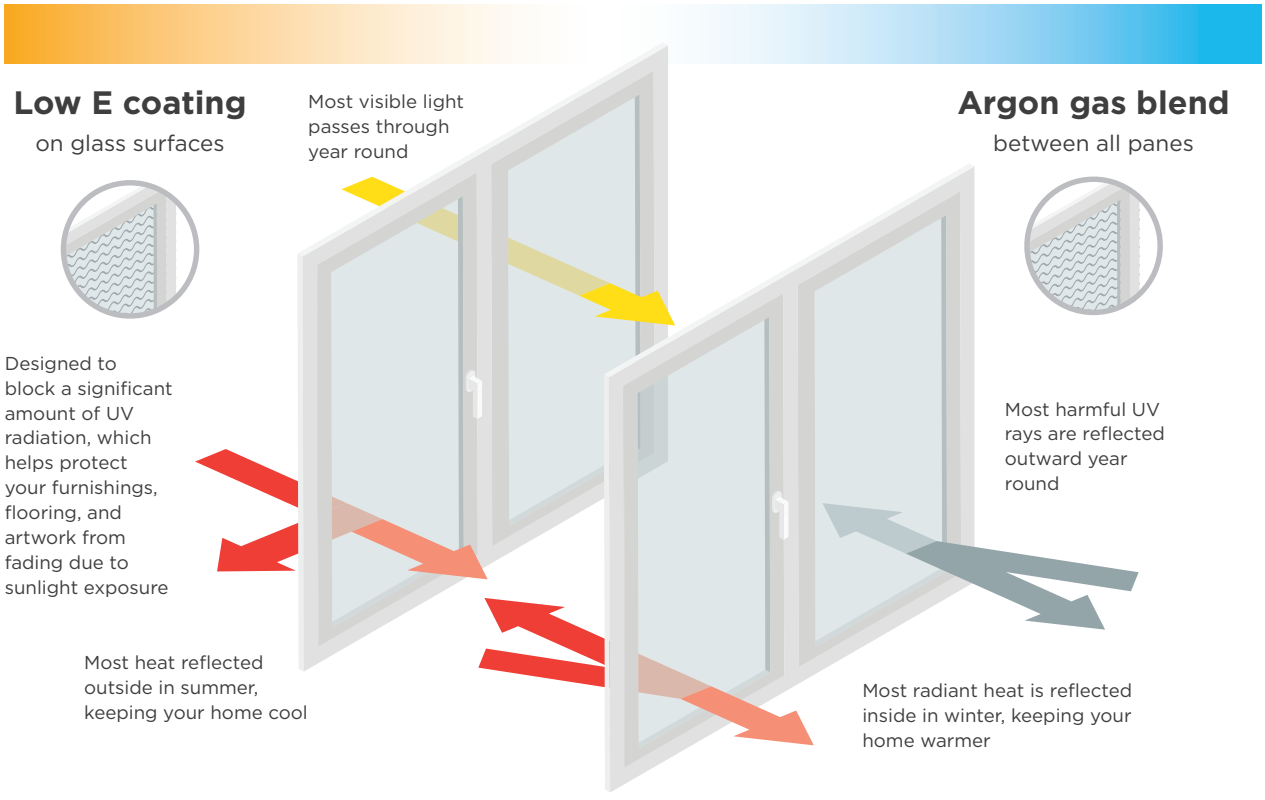

Low E Glass, lowering energy bills all year round

Summer

Reflects thermal energy in summer, keeping your home cooler Argon gas blend between all panes.

Winter

Retains heat into your home in cooler months.

Thermal Efficiency

With the Ultima range, comfort and sustainability go hand in hand. Our products are engineered with high-performance glazing that enhances thermal insulation, helping to maintain a consistent indoor temperature all year round. By reducing heat loss in winter and limiting solar gain in summer, our products not only improve energy efficiency but also contribute to lower energy bills.

Thermal Rating

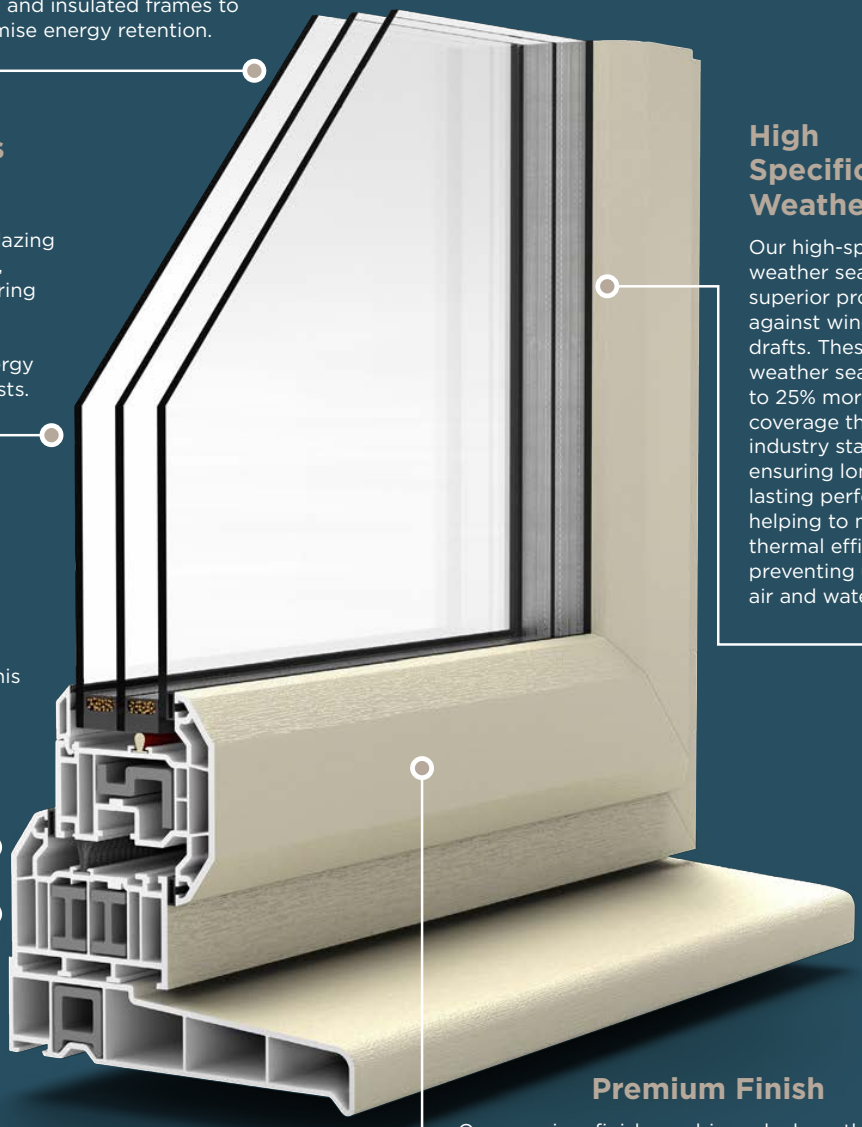

Our products are built with thermal efficiency at their core, using advanced glazing and insulated frames to minimise heat loss and maximise energy retention.

Reduced Heat Loss

Our windows and doors are designed to reduce heat loss through high-performance glazing and thermally broken frames, which help retain warmth during colder months. This not only improves indoor comfort but also contributes to lower energy consumption and heating costs.

Improved Drainage Path

The improved drainage path efficiently channels water away from the glazing and frame, reducing the risk of pooling and water ingress. This smart design helps maintain long-term performance and protects the integrity of the installation in all weather conditions.

High Specification Weather Seals

Our high-spec weather seals provide superior protection against wind, rain, and drafts. These durable weather seals offer up to 25% more weather coverage than the industry standard, ensuring long-lasting performance, helping to maintain thermal efficiency by preventing unwanted air and water ingress.

Multi-Chamber Outer Frame

Our multi-chamber outer frame improves thermal performance by creating multiple insulating pockets within the frame, which help reduce heat transfer and enhance energy efficiency. This design also adds strength and stability to the structure, contributing to long-lasting durability.

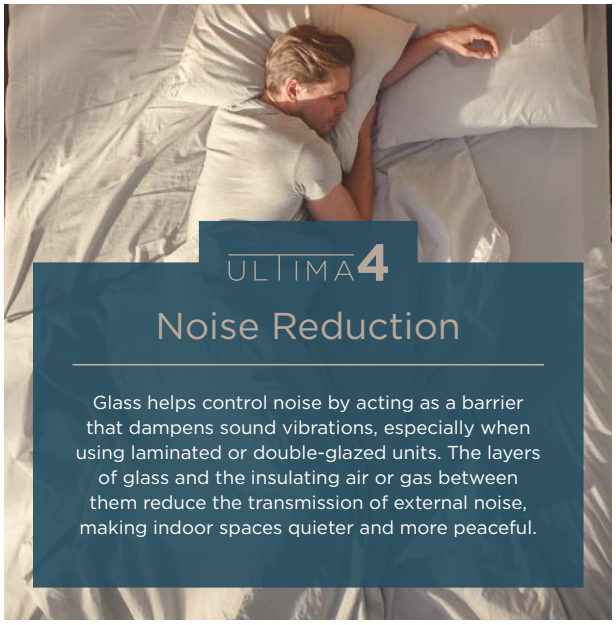

Premium Finish

Our premium finish combines sleek aesthetics with long-lasting durability, offering a refined look that complements any architectural style. Each product is crafted with attention to detail, ensuring a high-quality appearance with high-quality performance.

Glass Ranges

Our glass ranges offer high-performance glazing options tailored to enhance energy efficiency, security, and style. From clear and decorative finishes to acoustic and solar controlled glass, each range is designed to meet specific needs without compromising aesthetics. Whether you're looking to reduce heat loss, improve privacy, or add a design feature, our glass options deliver quality, durability, and versatility for every home.

Enjoy a 4-in-1 benefit by upgrading to ULTIMA 4

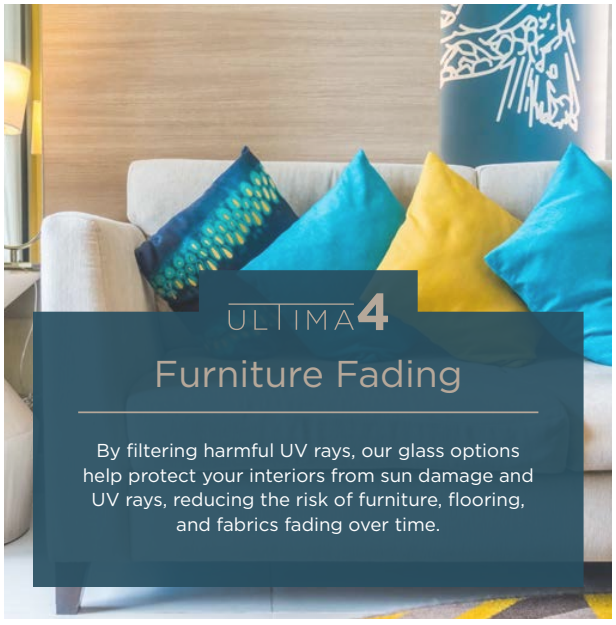

ULTIMA 4 Noise Reduction

Glass helps control noise by acting as a barrier that dampens sound vibrations, especially when using laminated or double-glazed units. The layers of glass and the insulating air or gas between them reduce the transmission of external noise, making indoor spaces quieter and more peaceful.

ULTIMA 4 Energy Efficiency

Our glass enhances energy efficiency by minimising heat loss in colder months and reducing heat in warmer months, helping maintain a stable indoor temperature.

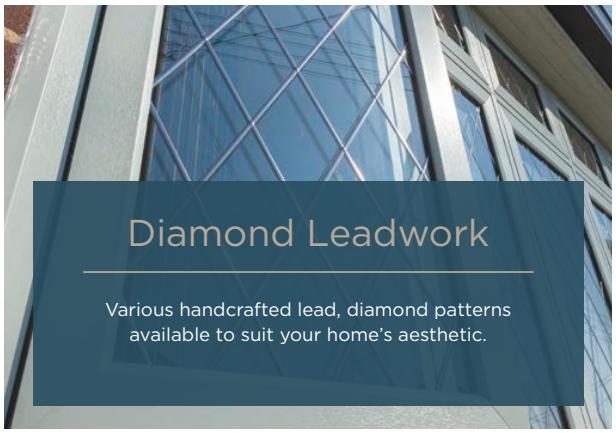

ULTIMA 4 Furniture Fading

By filtering harmful UV rays, our glass options help protect your interiors from sun damage and UV rays, reducing the risk of furniture, flooring, and fabrics fading over time.

ULTIMA 4 Safety & Security

Our glass enhances both safety and security by providing strong, transparent barriers that resist impact and deter unauthorized access.

Diamond Leadwork

Various handcrafted lead, diamond patterns available to suit your home's aesthetic.

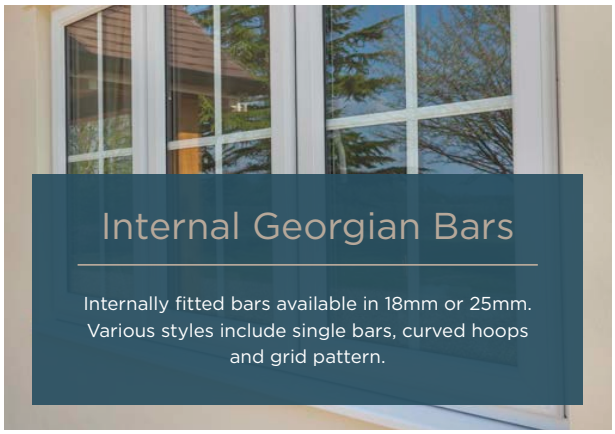

Astragal Bars

Fitted externally and internally, giving an authentic look to any window, door or conservatory. Available in a range of colours to suit your home.

Square Leadwork

Handcrafted square patterns in lead to create grid or border style designs.

Internal Georgian Bars

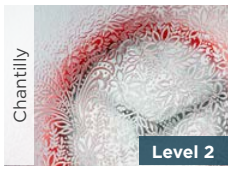

Internally fitted bars available in 18mm or 25mm. Various styles include single bars, curved hoops and grid pattern.

Obscure Glass

Different patterns to choose from with 5 levels of obscurity -
Level 1 = Least private **Level 5** = Most private

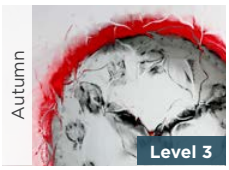

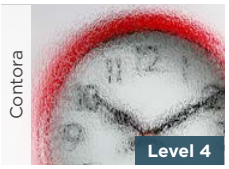

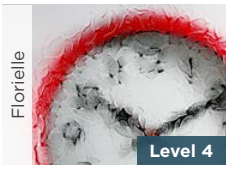

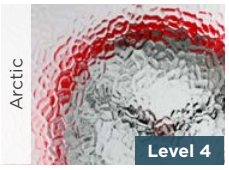

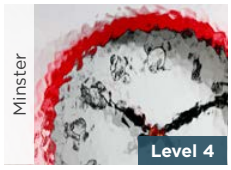

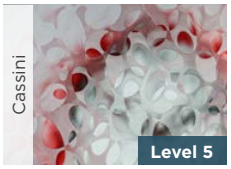

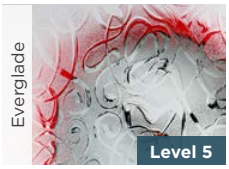

Aluminium Range

Engineered for modern living, these doors offer exceptional thermal efficiency with impressively low U-values, helping to reduce energy costs and enhance comfort year-round. Fully compliant with PAS 24 standards, our aluminium doors deliver robust security without sacrificing style.

Windows

Our super slim aluminium windows have been designed to meet all the insulation requirements of modern properties whilst being attractive and bespoke to your home.

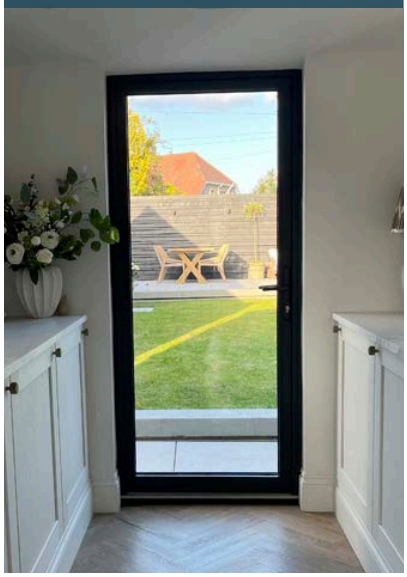

Bifold Doors

Sleek and modern, our aluminium bifold doors are handcrafted to bespoke specifications and are paired with carefully selected hardware components to provide maximum strength and quality.

Single Doors

Our aluminium single doors combine sleek aesthetics with outstanding performance, offering low U-values for superior thermal efficiency and full PAS 24 compliance for enhanced security and peace of mind.

Slimline Sliding Patio Doors

Our ultra slim aluminium patio doors offer expansive openings and smooth operation, combining contemporary style with excellent thermal performance.

French Doors

Our sleek, made-to-measure aluminium french doors feature slim sightlines and the same advanced profile as our aluminium bifolds, offering the flexibility to open one sash or both to support indoor/outdoor living.

Shape Frames

Our shape frames bring a touch of individuality to any space, blending beautifully with both modern and traditional architecture. Whether it's a soft arch or a bold design, these bespoke frames let natural light flow in while adding character to a space.

Roof Lights & Roof Lanterns

Our roof lights and roof lanterns are designed to maximise natural light and create a stunning architectural feature. Combining sleek aesthetics with excellent thermal performance, they enhance energy efficiency while brightening interiors. Ideal for kitchens, extensions, or lofts, these products offer durable construction, secure installation and a stylish way to open up your space.

Our roof products are expertly crafted to transform your living space by flooding it with natural light and adding an architectural feature. Their sleek, minimalist design suits both modern and traditional homes, making them ideal for kitchens, extensions, and loft conversions.

Built with high-performance glazing and excellent thermal insulation, they help maintain energy efficiency and indoor comfort throughout the year. Durable materials and secure installation ensure long-lasting performance and peace of mind. Whether you're looking to brighten a room or create a sense of openness, we offer a stylish, practical solution that enhances your home's aesthetics and functionality.

Product Features

Roof Lights

- Range of sizing options

Roof Lanterns

- Highly thermally efficient
- Ultra-thin 12mm 'V' profile
- Quick fit
- Sizes up to 2.4 x 3 meters
- GUARD-lock technology
- U-values as low as 0.6 W/(m^2K)
- Double and triple glazed options
- Available in 3 standard colours
- Bespoke colours available

Composite Doors

Manufactured with premium-quality materials, the range is designed to deliver outstanding performance while offering excellent value. Drawing on innovations from leading industry partners, every detail is crafted with care to provide doors that combine style, durability, and security. With a wide variety of designs, finishes and features available, there's an option to suit every home and personal style.

Made to measure, built to last.

Product Features

- A wide choice of designs and styles to complement any home
- Exceptional thermal efficiency for energy savings
- Advanced security features for peace of mind
- Durable, low-maintenance construction for long-lasting performance
- Innovative design details that enhance both function and style

Cylinders

Our most advanced locking system ever. **Tried, Tested, Secure.**

Our high-security cylinder lock offers maximum protection against forced entry methods. Featuring a patented Active Snap Protection System and a hardened molybdenum core, it meets top industry standards. Available in multiple finishes and configurations, it includes three keys per cylinder, optional thumbturn designs and is backed by a Snap Secure Guarantee for ultimate peace of mind.

Product Features

- **Smart Technology That Never Sleeps:** Like a vigilant guardian, our locks use advanced security features to protect your home 24/7
- **Built to Last:** We test each lock relentlessly, ensuring the best possible safety for your family
- **Smooth as Silk:** Our ProGlide key technology means no more jiggling or wrestling with sticky locks, just smooth, effortless entry every time
- **Our Promise to You:** When fitted by an approved ABS specialist, your lock comes with a £2,000 snap secure guarantee. That's how confident we are in our protection

Recycling & Sustainability

With Ultima, sustainability is built into the range from the very beginning. Many of the products are crafted from PVC and aluminium - materials known for their naturally long lifespan and ability to support greener living. The range also focuses on energy-efficient designs that help reduce carbon emissions while delivering excellent performance. From manufacturing to packaging, every element is designed with the goal of minimising environmental impact. Choosing Ultima products means investing in high-quality windows and doors that not only look and perform beautifully, but also contribute to a more sustainable future.

Glass Recycling

Every pane of glass has a second life. When we remove old windows, the glass is carefully separated and crushed into cullet - the raw ingredient for new glass. Our glass supplier, Saint-Gobain, re-melts this cullet back into high-performance window glass at their UK plants.

uPVC Recycling

Your old uPVC frames never go to waste. Through our partnership with Epwin (Profile 22), we send all factory off-cuts and post-consumer frames to be shredded, cleaned and pelletised.

These recycled granules are then re-extruded into new, durable uPVC profiles - often with a recycled core and virgin outer layer for a pristine finish.

The circular process reduces waste, lowers energy use and **cuts carbon emissions by up to**

3%

for every

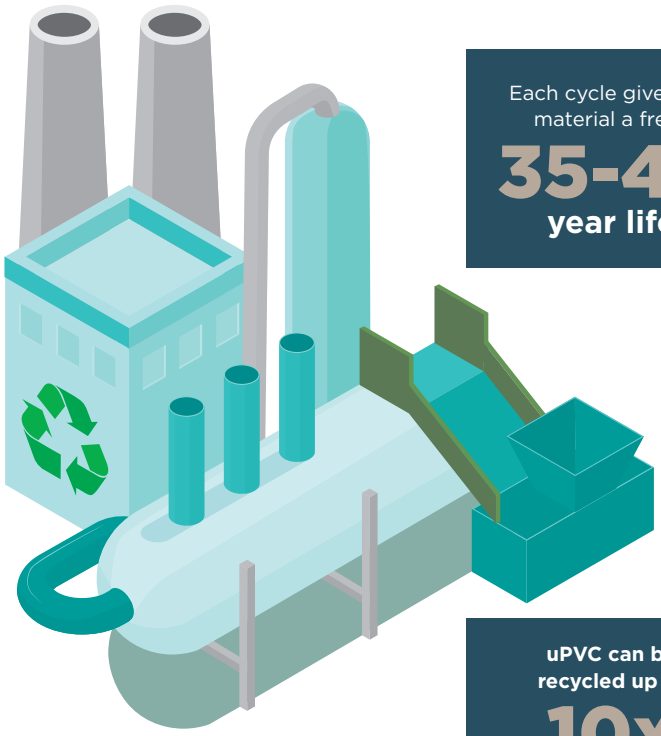

10%

of recycled glass used - keeping resources in use and out of landfill.

Each cycle gives the material a fresh

35-40

year life

Both our glass and uPVC profiles contain **high levels of recycled content up to**

64%

recycled glass

and significant proportions of recycled uPVC in the core of the frames.

uPVC can be recycled up to

10x

without losing performance.

Production of new products containing recycled materials

Sustainability is built into every new window and door we install. By choosing Ultima, you're investing in products that don't just look good and perform brilliantly, but actively reduce embodied carbon and reliance on virgin materials

Removal of old windows, restarting the process

When it's time for an upgrade, the cycle continues. We collect and responsibly recycle your old windows and doors as part of our installation and replacement process.

Glass and uPVC is reprocessed and reintroduced into new, modern products. From removal to remanufacture, every step keeps materials in circulation and reduces waste - ensuring your new windows are part of a true closed loop system.

Put the style back into your home
Vertical Sliding Sash Windows
ECOSlide
The No.1 Sash Window Brand

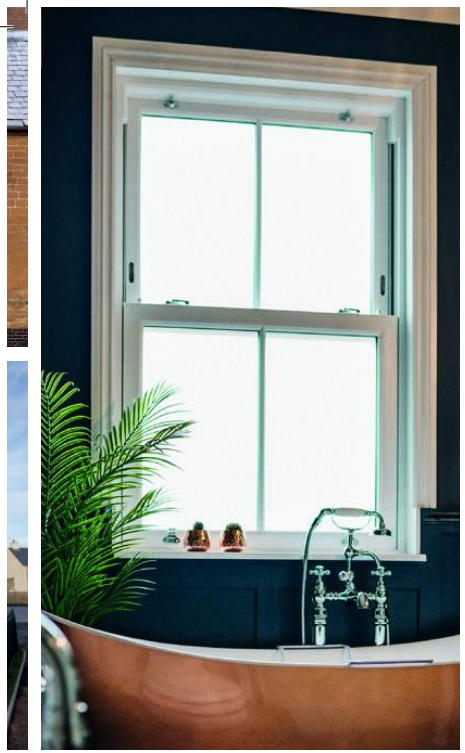

ECOSlide PVC-U sash windows will enhance your home

Vertical sliders are a traditional style of window. Commonly found in older properties, they are usually manufactured from timber. This elegant type of window is a popular replacement in period properties, with its design giving homes a sense of sophistication and charm that a traditional casement window can't match. But real casement windows can be expensive – which is why homeowners look to more affordable alternatives like PVC-U.

Whether you live in an older property or a more modern home, **ECOSlide** PVC-U sash windows are a stylish and cost-effective solution. They excel both as like-for-like replacements, and as alternatives to other styles.

Choose from an extensive range of colour, finish and hardware options, and you can perfectly tailor an **ECOSlide** window to the look and feel of your home.

Cutting energy bills and carbon footprints

With energy bills soaring, homeowners are looking for one thing more than any other – energy efficiency.

A+ rated as standard, and delivering U Values of just 1.4, **ECOSlide** is the perfect choice for balancing timeless style and twenty-first century performance.

ECOSlide
The No.1 Sash Window Brand

Windows to suit your style

If you're replacing existing sash windows, we can offer a wide choice of styles to match them as closely as possible, and maintain the character of your home.

We can replace bay-style windows including splay and box bay windows. These are a common feature in older properties, and when combined with a sliding sash window their installed appearance is very impressive.

We can also replace arched and swept head windows. These shaped styles are incredibly eye-catching. **ECOSlide** PVC-U sash windows are bespoke-manufactured to your exact requirements to maintain the charm and appeal of your home.

Other design options are available with internal Georgian bar or external astragal bar detailing, to ensure your new windows are as authentic as possible.

Sliding

ECOSlide PVC-U sash windows primarily function like wooden box sash windows, with both the top and bottom sashes sliding up and down to suit your ventilation requirements.

Convenient and simple to operate, the two sliding sashes within an outer frame work independently of each other on a balanced load mechanism, designed to hold the sash at any height.

Tilt & Easy Clean

ECOSlide PVC-U sash windows are incredibly low maintenance, requiring only a quick wipe down with a damp cloth to keep them looking as good as new.

The window sashes feature an inward opening tilt facility to allow easy and safe cleaning of the outside frame and glass from inside your home.

This is particularly useful for second storey windows, or windows positioned in a hard to reach place, like above a conservatory.

ECOSlide
The No.1 Sash Window Brand

Colour & Foil Options

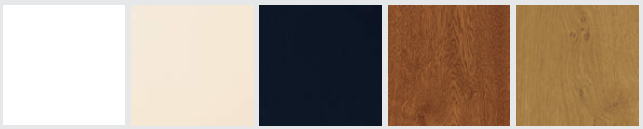

Timber box sash windows were always painted, and you can replicate this look. If you want a more natural effect, our Crystal White, Cream, Golden Oak and Irish Oak foils give a realistic woodgrain appearance that mimics the grained texture and appearance of an original timber window.

We also offer colour outside/white inside options in Chartwell Green, Anthracite Grey, Agate Grey, Rosewood, Black Brown, Cream, Golden Oak and Irish Oak. With this option, you can choose the external colour you like, while maintaining a white interior to better suit your home's decoration.

Spraying and colour matching

Our on-site paint shop enables your **ECOSlide** PVC-U sash windows to be spray painted to match virtually any RAL code or colour.

You can personalise your vertical sash windows and colour co-ordinate them to match your property or just to suit your own personal taste. Our optional spray painted finish is applied to the highest standards and will provide a unique and colourful addition to your home.

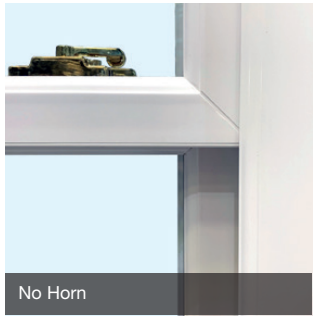

ECOSlide
The No.1 Sash Window Brand

Attention to detail

It's the little details that help make **ECOSlide** sash windows as authentic as possible. Our PVC-U windows are designed to be smooth and sleek with slim profile sections giving a better appearance, which is pleasing to the eye as well as offering improved views from the inside and outside.

To complete the timber-like appearance, our windows incorporate the same stylish features found on original timber sash windows such as astragal bars, decorative sash horns and traditional-style operating hardware.

The jambs, sash sections and meeting rail are all engineered to look just like a timber sash window, giving you truly authentic looking new windows.

Hardware and Security

Add the finishing touches to your new windows with traditionally-styled vertical slider hardware. Pole eyes, tilt knobs, sash lifts, sash locks and travel restrictors are fitted as standard, but we can also offer D handles if needed. All hardware is available in Chrome, Gold, White, Black or Satin Chrome to complement our range of colours.

Other additional options are available such as Georgian or Astragal glazing bars and trickle vents, to give your new windows a truly authentic and classical vertical slider look.

In addition to this, **ECOSlide** PVC-U sash windows are designed to be extremely safe and secure. High-performance locking systems keep your home safe from potential intruders to give you extra peace of mind.

For added safety, we also offer the option of a 'Fire Egress' window design to provide emergency escape.

Trickle Vents

To comply with the requirements of Part F of Building Regulations, which governs ventilation, **ECOSlide** comes with the maximum number of trickle vents as standard.

If implemented poorly, trickle vents can ruin the appearance of a window. However, thanks to an ingenious design, **ECOSlide's** trickle vents are concealed, allowing the product to achieve Part F standard without spoiling their heritage aesthetics.

ECOSlide
The No.1 Sash Window Brand

The Victorian Sliders Story

Since 2005, Victorian Sliders has established itself as one of the country's leading manufacturers of PVCu sash window products.

Designed and manufactured in Wales, its **ECOSlide** window was created to provide a convenient, cost-effective and aesthetically pleasing alternative to casements.

Tens of thousands of homes around Britain and Ireland now benefit from the curb appeal and outstanding thermal performance it can provide.

- A+ rated energy efficiency
- U Values of 1.4
- Part L & F compliant
- Coloured foils and RAL spray-painting available
- Anti-jemmy bar and toughened glass as standard
- From Europe's largest sash window manufacturer

Trickle Vents
Cleverly positioned trickle vents allow the window to meet Part F of Building Regulations without spoiling its aesthetic appeal.

D Handle
These optional easy-grip handles can be used in place of pole-eyes or sash lifts, and can be fitted externally on the bottom of the top sash for ease of operation.

Pole Eyes
Used for opening and closing the top sash. One Pole Eye is fitted to windows up to 479mm wide. Two are fitted on windows 480mm wide and over.

Travel Restrictors
Provides enhanced security and safety for your vertical sliding sash windows. Used to restrict the opening of the window to just 100mm. Key operated.

Tilt Knobs
Allow inward tilting of the sliding sashes for easy and safe cleaning from inside the home. Two Tilt Knobs are fitted as standard.

Sash Locks
Locks both bottom and top sashes firmly in place when the window is fully closed. Key lockable. One sash lock is fitted to windows up to 799mm. Two are fitted on windows 800mm wide and over.

Toughened Glass
Fitted in both top and bottom sashes as standard.

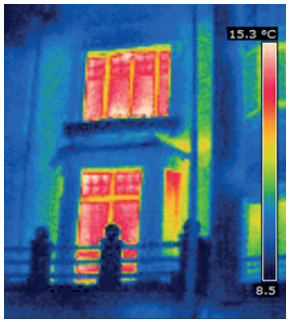

Security Bar
This specially-designed feature is an integral part of the window cill which significantly increases security, to help prevent potential intruders using tools or excessive force to try and lever open the bottom sliding sash and gain entry.

Sash Lifts
Used for opening and closing the bottom sash. One Sash Lift is fitted to windows up to 479mm wide. Two are fitted on windows 480mm wide and over.

Energy Efficiency & Ratings

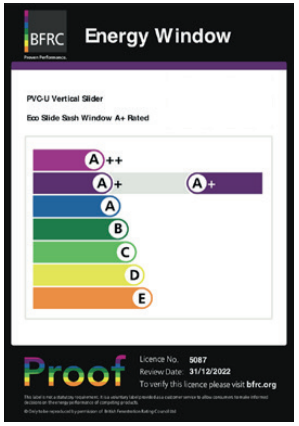

Enjoy a warmer, more comfortable home with energy efficient sash windows

Windows are given energy ratings based on their ability to insulate your home. In response to tightening government regulations on sustainability, **ECOSlide** now offers A+ rated energy efficiency as standard.

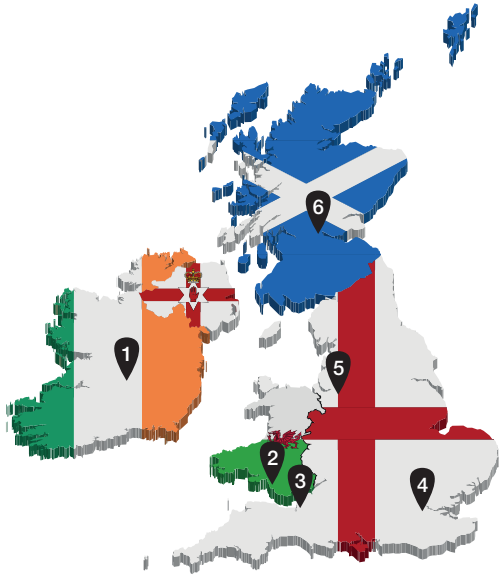

Putting the style back into your home with **ECOSlide** will make your home a warmer and more comfortable place to live, saving on your energy bills year on year.

Would you like to learn more about how **ECOSlide** can help you cut both your carbon footprint and your energy bills?

E&OE: Please note the information contained in this brochure is subject to change, and improvements in specifications are possible in future. SECTION 10 · WINDOWS

Liniar PVCu Windows

British-made profiles with energy ratings up to A++ and U-values as low as 1.2 W/m²K.

PVCU

2 PAGES · PAGES 263–264

Why choose Liniar windows?

Technically advanced
The technology used in many other PVCu window profiles is at least 20 years old. Liniar's profile was designed completely from scratch in 2007 and is far more technically advanced - built for today's exacting challenges.

British made
Liniar profiles are extruded in Derbyshire at the HL Plastics manufacturing plant, which boasts the largest mixing plant in the UK. Continued investment in the factory and facilities keeps Liniar at the forefront of innovation.

Designed by experts
The Liniar range is designed, manufactured and supported by a team with over 500 years' experience within the window industry.

More thermally efficient
Liniar's revolutionary profiles are far more thermally efficient than traditional PVCu window profiles. By removing unnecessary steel reinforcement, instead developing the latest in multi-chambered profile technology, we make sure the heat stays where it belongs – inside your home.

More cost-effective
Liniar profiles deliver even more energy savings for the homeowner. Liniar window systems are capable of achieving WERs (Window Energy Ratings) of A++, with U-values as low as 1.2w/m²K (DGU) and 0.8w/m²K (TGU).

Better for the environment
Liniar frames have always been 100% lead-free, well in advance of legislation. Furthermore, all elements of a Liniar window are fully and easily recyclable at the end of its life.

Less frame, more glass
Ultra-slim sightlines designed into Liniar products allow in maximum natural light – and result in more attractive windows and doors.

Strong and secure
Our windows and doors are tested to the latest security standards. PAS24 and Secured by Design were achieved with flying colours, making Liniar windows compliant to Part Q building regulations.

Fully tested
Not only does Liniar carry out weather testing and security testing, it has invested in a robot for cyclic testing, giving customers peace of mind that their Liniar products will endure the rigours of daily living.

Beautiful colours
Liniar's coloured foils give the appearance of woodgrain and won't peel or scratch off - and the whole Liniar range is available in a wide choice of colours with an easy clean, low maintenance finish.

Accredited
It's important to Liniar to prove its products are backed by the highest standards - Liniar windows and doors hold the following accreditation:

PAS24 · SBD · BS 12608 · ISO 9001 · BS 6375 · BBA

Liniar Windows New.indd 1 15/05/2017 13:49

Why choose Liniar windows?

Technically advanced

The technology used in many other PVCu window profiles is at least 20 years old. Liniar's profile was designed completely from scratch in 2007 and is far more technically advanced - built for today's exacting challenges.

British made

Liniar profiles are extruded in Derbyshire at the HL Plastics manufacturing plant, which boasts the largest mixing plant in the UK. Continued investment in the factory and facilities keeps Liniar at the forefront of innovation.

Designed by experts

The Liniar range is designed, manufactured and supported by a team with over 500 years' experience within the window industry.

More thermally efficient

Liniar's revolutionary profiles are far more thermally efficient than traditional PVCu window profiles. By removing unnecessary steel reinforcement, instead developing the latest in multi-chambered profile technology, we make sure the heat stays where it belongs – inside your home.

More cost-effective

Liniar profiles deliver even more energy savings for the homeowner. Liniar window systems are capable of achieving WERs (Window Energy Ratings) of A++, with U-values as low as 1.2w/m²K (DGU) and 0.8w/m²K (TGU).

Better for the environment

Liniar frames have always been 100% lead-free, well in advance of legislation. Furthermore, all elements of a Liniar window are fully and easily recyclable at the end of its life.

Less frame, more glass

Ultra-slim sightlines designed into Liniar products allow in maximum natural light – and result in more attractive windows and doors.

Strong and secure

Our windows and doors are tested to the latest security standards. PAS24 and Secured by Design were achieved with flying colours, making Liniar windows compliant to Part Q building regulations.

Fully tested

Not only does Liniar carry out weather testing and security testing, it has invested in a robot for cyclic testing, giving customers peace of mind that their Liniar products will endure the rigours of daily living.

Liniar

Your Liniar stockist is:

7 **great reasons** to choose Liniar

Innovative – Liniar's string of patents and registered designs is testament to its ongoing new product development

Energy efficient – designed from scratch to achieve the pinnacle of thermal performance and retain more heat in your property

Safe and secure – engineered with built-in security features and approved by independent testing facilities

British made – manufactured in our state-of-the-art factory in the heart of Derbyshire

Lead free – all Liniar profiles are extruded using materials that are 100% lead free

Quality assured – backed with ISO 9001 accreditation for your peace of mind

Guaranteed – all Liniar frames are guaranteed to not warp, split or discolour for a minimum of 10 years

BLINDS IN GLASS

C SYSTEM
MANUAL CONTROL

Uni-Blinds®

Innovation comes built-in

LIGHT & SHADE MADE EASY

The Corded Uni-Blind is a patented magnetic system enabling the manual operation of Venetian blinds incorporated within the 20, 22, 27 or 29mm cavity of insulating glass units. With this system, the slat raising, lowering and tilting function is achieved using a rotational magnetic transmission through the glass, thereby guaranteeing the double-glazed unit's hermetic seal. Two set of magnets work together to provide this functionality – one is inserted in the blind head rail within the cavity and the other applied to the external glass surface.

Be in full control of the light in your home

A continuous cord loop drives the external magnet, which controls the raising and lowering of the blind. The cord is held lightly under tension by a cord tensioner and fully complies with the British Blind and Shutter Association – 'Make it Safe' campaign.

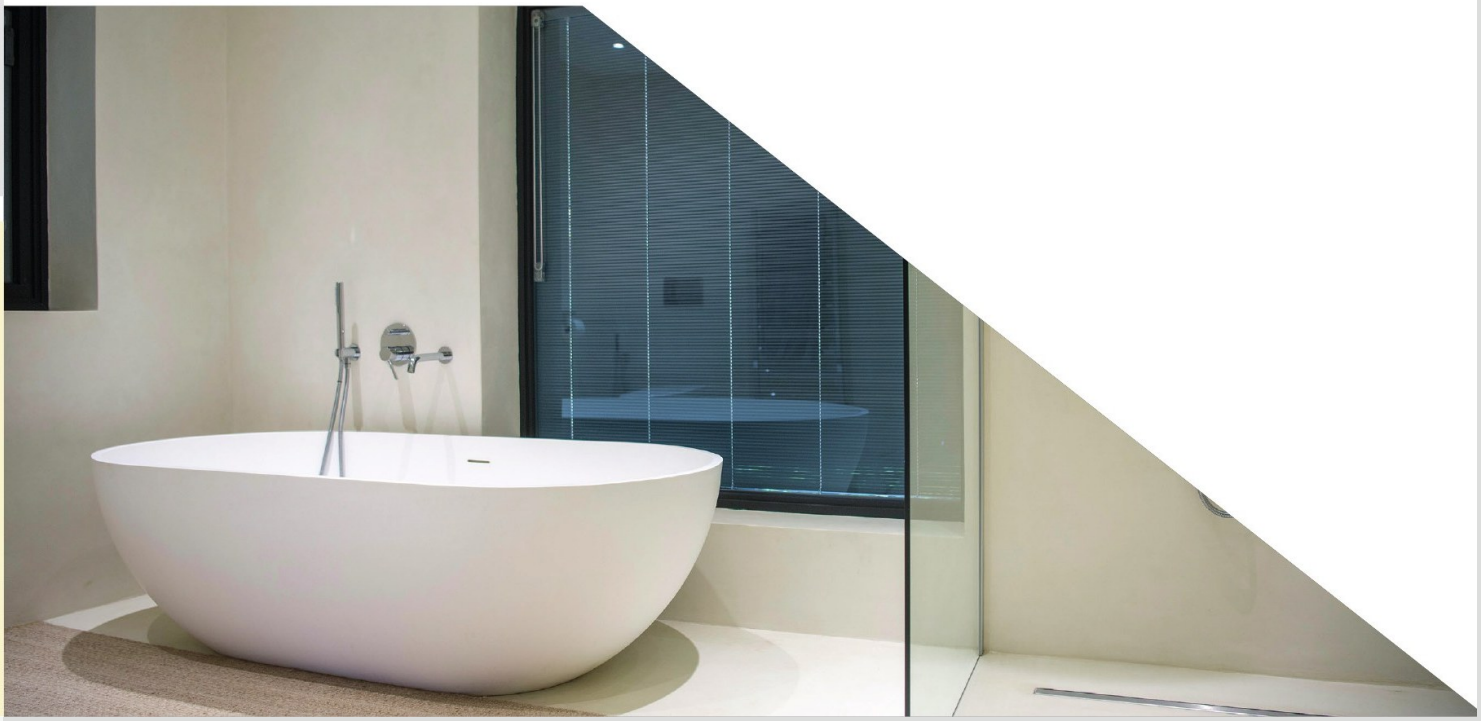

make it safe™

BENEFITS OF THE CORDED SYSTEM

Simple, elegant, corded blinds

- Suitable for all vertical window applications
- Ideal solution for conservatory shading
- Total privacy and light control for sliding or bi-fold doors
- Enables excellent utilisation of partitioned office space requiring privacy
- Suitable for retro installation into existing frames

HOW THE C SYSTEM OPERATES

RAISING LOWERING TILTING

There are several different ways that Uni-Blinds® Venetian blinds can be operated using the C System. They are all equally reliable and smooth so the choice is really down to how the blinds will be used and personal preference.

Cord

With the cord mechanism, the slat raising, lowering, and tilting function is achieved using a rotational magnetic transmission through the glass. This is taken care of by one set of magnets inserted in the blind head rail within the cavity and the other applied to the external glass surface.

Wand

The wand mechanism comprises a small pole attached at the top to the room-facing pane of the double glazed unit. It is twisted to open and close the blind just like traditional Venetian blinds. Please note that wand operation can only function to tilt the blind and cannot be used to raise the blinds completely.

Rotational Knob

A stylish rotational knob mechanism is recommended for tilt-only Uni-Blinds® where a clean window or door's appearance is sought, free of the obstruction of a cord or wand down the glass unit. The rotational knob enables the opening and closing of the Venetian blind in a smooth, easy to use motion.

ADD A SPLASH OF COLOUR

SLIDING CONTROL

Uni-Blinds®

Innovation comes built-in

SLIDING VENETIAN
CORDLESS CONTROL

The SL20SV integrated Venetian blind provides a smart solution for any window and door with its clever slider controlling all the blind functions in one easy device.

Based on the technically superior Screenline® integral blind system from globally renowned manufacturer Pellini, the SL20SV provides a slicker overall visual result with no cords on the face of the glass. Like all Screenline® blinds, the SL20SV sliding system represents the highest quality and operational reliability of any integral blinds.

The blind is encapsulated within the two glass panes of a double glazed unit, with thermal efficiency optimised thanks to a warm edge spacer bar as standard.

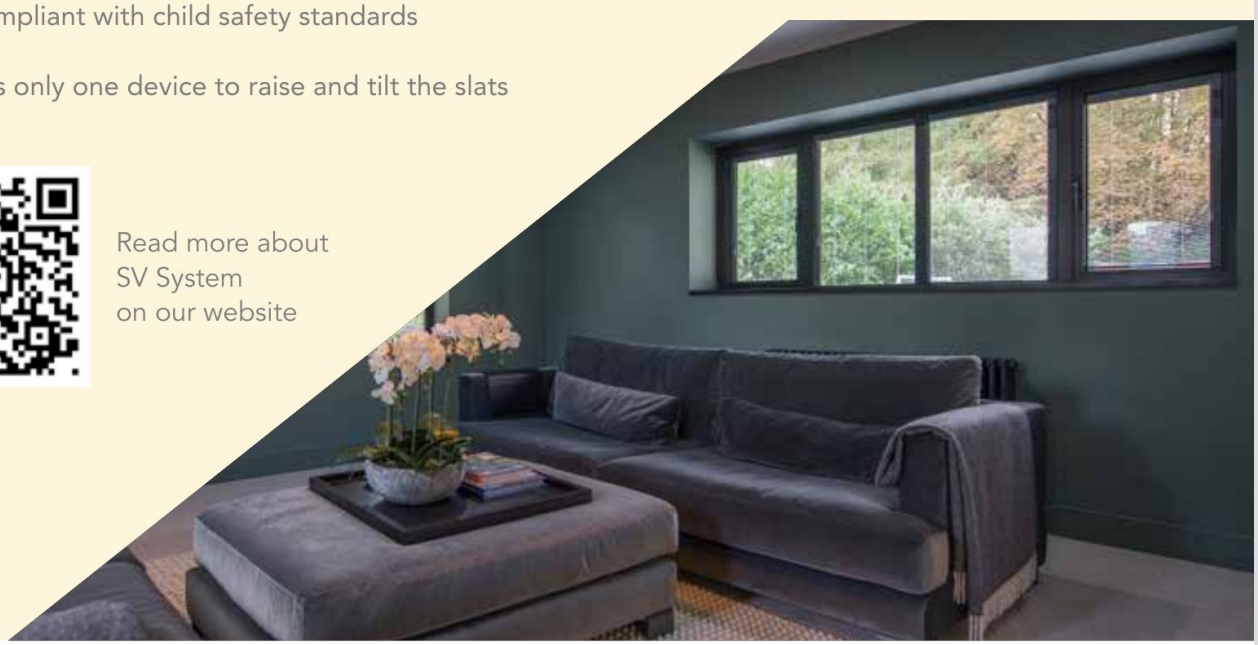

BENEFITS OF THE SV SYSTEM

SV System: The Benefits

- Closed-loop belt transmission system allows a smooth and long-lasting function of the blind
- External magnetic slider is treated with the Sanitized® patented antibacterial finish, providing a long-lasting protective function
- Patented warm edge spacer bars and a premium quality plastic side profile combine to maximise energy performance of the insulating glass unit
- Fully compliant with child safety standards
- Requires only one device to raise and tilt the slats

Read more about
SV System
on our website

HOW THE SL20SV OPERATES

RAISING LOWERING TILTING

The SL20SV is operated by a cleverly-designed magnetic slider, placed on the right or left-hand edge of the glass. A narrow adhesive transparent profile ensures the linear movement of the slider. The blind is raised and lowered by moving the slider up or down and is tilted by slightly lifting or lowering the same slider.

Protected with
SANITIZED®

BLINDS IN GLASS

W SMART
SOLAR CONTROL

Uni-Blinds®

Innovation comes built-in

INNOVATION COMES BUILT IN

Wire-free solar powered, eco-friendly simplicity is at the heart of the advanced W Smart system with ScreenLine® inside. This system enables a Venetian blind encapsulated within a double-glazed unit to be raised, lowered and slat tilted via a single control device attached to the window, or by remote control. Suitable for both residential and commercial environments, W Smart is sleek, maintenance-free and available for Uni-Blinds® integral blinds within 20, 22, 27 or 29mm cavities.

Why choose the W Smart?

W Smart is perfect for sustainable homes and commercial properties. It combines the latest innovations in ecological Italian design with the long term reliability and superb build quality that defines every ScreenLine® system. The carbon-saving motorised blinds feature a smooth and quiet 3.6V motor, powered by a solar power charged lithium-ion battery, for use any time of the day or night. They are easy to operate too thanks to an intuitive touch control unit complete with LED illuminated arrows and low-battery indicator.

BENEFITS OF THE W SMART

A remote-controlled integral Venetian blind which oozes appeal:

- Streamlined installation procedure
- No need for an electrician to install
- Energy saving
- For 20, 22, 27 and 29mm cavities, in Venetian Uni-Blinds®
- Touch control keys
- Radio remote control supplied as standard
- Batteries can also be recharged by means of a micro-USB connector
- Compact battery module, developed in co-operation with design specialists

Light control

Provides high solar protection, privacy and excellent light control.

Wide range

Available for Venetian for 20, 22, 27 and 29mm insulating glass units.

W Smart control system

In W (Wireless) Smart systems, blinds are raised and lowered by a control device which allows light and heat gains to be adjusted with ease. A user-friendly, versatile and energy-saving system, its power comes from an externally mounted solar panel and it is guaranteed to provide excellent shading performance.

External Controller protected with **SANITIZED®**
